Sub: Submission of our difficulties and objection regarding proposed Amendment to our PPAs 204/2015 for 5MW solar plants at Rajapet by TGSPDCL.

Ref: Your notice letter D no 843 received on 02.01.2025

Dear Sir

With reference to your notice letter no. 843 cited at reference above, we herewith submit our difficulties and objections to the proposed amendment by TGSPDCL as below:

1. We are importing power only for lighting and for maintaining DC and Communication system to SLDC during night and during plant shut down due to unavoidable faults by grid and grid induced breakdowns and force majeure condition beyond our control
2. SLDC has been asking to maintain communication on a round-the clock basis
3. We have been successful and trying our best in limiting our consumption within the permissible limits as per PPA
4. We are compelled to import power sometimes in daytime due to problems from Grid and departmental restrictions beyond our control
5. The Power factor variations and reactive power are due to grid issues and not attributable to us and beyond our control
6. We do not agree with TGSPDCL proposal for penalizing us by imposing HT tariffs for grid induced issues of power factor and reactive power and KVA based billing.
7. We have quoted fixed tariff for 25 years based on clause for adjusting all imports from delivered energy at quoted tariff only.

CORPORATE OFFICE:

Cybercity Builders & Developers Pvt. Ltd.

It is therefore requested not to consider the amendment proposal of TGSPDCL for penalizing us with HT charges due to reasons not attributable to us as explained above and maintain status quo with present PPA as we have quoted our tariff for 25 years based on KWH based billing only and all imports are adjusted from delivered energy with quoted and we did not factor HT rates penalization in our tariff.

With regards

For and on behalf of
