

1st Corrigendum to the Tender No 483495 Dated 16.12.2023	
	At SI No 179 in Firefighting BoQ at SI No 179, the missing items are given as below, the same may be considered while quoting the rates
179	Supply, installation, testing and commissioning of External Yard Hydrants comprising of the following:
	Supplying and fixing single headed Internal hydrant valve with instantaneous Gun metal couplings of 63mm dia with Cast iron wheel ISI marked conforming to IS 5290 (Type -A) with blank Gun Metal cap and chain as required. Make: Mini Max / Safex / Newage / Winco / Padmini.
	Supplying and fixing 63mm dia, 15 mtr long RRL Hose Pipe with 63mm dia Male and Female Gun metal couplings duly binded with GI wire, rivets etc conforming to IS 636 (Type -A) as required. Make: Mini Max / Safex / Newage / Winco / Padmini.
	Supply and fixing 63mm dia Gun metal branch pipe with 20mm (Nominal internal diameter) size Gun metal nozzle conforming to IS 903, suitable for instantaneous connection to interconnect hose pipe coupling as required
	Supply and fixing of hose cabinet of size 750mm X 600mm x 250mm made of No 16 gauge SWG CRCA sheet with 6mm thick glazed glass door including necessary locking arrangement suitable to accommodate 2 Nos 15 mtr long Hose pipe, 1 No branch pipe, mounted on wall OR raised brick platform and duly painted with Post office red externally and white internally with synthetic enamel paint complete in all respect, for external hydrant as required. Make: Mini Max / Safex / Newage / Winco / Newtech / Padmini. / Karta
	Supply, Transportation, laying, testing & commissioning 80 mm dia. GIDF stand pipe (1 mtr. below ground + 1 mtr. above ground of 'B' class heavy duty MS pipe conforming to IS 3589/IS 1239 including Welding, fittings like elbows, tees, flanges, tapers, nuts bolts, gaskets etc. and fixing the pipe on the wall/ceiling with suitable clamp/support frame and painting with two or more coats of synthetic enamel paint of required shade complete as required Makes : Jindal Hissar / Tata pipes
	Supplying and wrapping the anticorrosive material for 80mm nominal dia buried pipes with coating of Primer and wrapping with 4 mm thick polymer corrosion resistant tape as per IS : 10221 with 15 mm overlap as per standard specificatios.

Message from Chairman CII-Sohrabji Godrej Green Business Centre

Dear Friends

I am glad to witness the concerted efforts of Indian industry in embracing green and making rapid strides. When CII embarked on the green building journey in the early 2000's, we believed CII should walk the talk, before it preaches green. Largely due to this belief and ideology, CII has positioned India emerge as one of the global leaders in green and paved way for new growth opportunities.

The growing demand for green buildings has increased the penetration of eco-friendly products, materials and technologies. The GreenCo which has been well received by the industry would also open up similar opportunities. The launch of 'GreenPro'- an ecolabel by CII would supplement our efforts in facilitating GreenCo and green buildings. Earlier concerns like due diligence to evaluate green products are being addressed by GreenPro in a holistic fashion.

On the supply side, GreenPro facilitates product manufacturers to incorporate green features across the 'life cycle' of their products. On the demand side, CII is creating larger awareness amongst business leaders and designers to embrace green products.

I am glad GreenPro has received recognition from the Global Ecolabelling Network (GEN) and UN Environment.

I congratulate Mr ParasuRaman R, Chairman, Green Products and Services Council, chairmen of all technical committees and members for their excellent contribution towards making this initiative successful. I am glad that Second Edition of GreenPro Directory is being released.

I invite you all to partner with CII in building a greener and healthier India.

Jamshyd N Godrej

Chairman,
CII- Godrej GBC

Message from Chairman Green Products & Services Council

Today, going the green way is no longer a choice but an imperative for a sustainable tomorrow. Indian construction sector is playing a vital role in this direction. This sector has been one of the early adopters of green products, materials and technologies for enhancing the Green performance of their buildings.

One of the key challenges before the construction industry is to identify and incorporate the right green products, materials and technologies in the project. Further, stakeholders are also keen to know what exactly constitutes a green product. To address these aspects, CII has established Green Products & Services Council. The Council in partnership with various National & International stakeholders has launched GreenPro - Green Product certification, a holistic mechanism to assess how green is a product and certify.

Today, GreenPro certification process is serving as an excellent tool for all the architects, consultants, builders, developers, end users and specifiers for selection of green materials, products and technologies during green building construction.

In the past 5 years, over 1800 products from more than 125 companies have achieved GreenPro certification and many are in the pipeline.

To facilitate the end users to choose right green products and materials, CII-Green Products and Services council has developed a directory of 'GreenPro' certified products.

We are sure, the 'Directory on Green Products, Materials and Technologies' will be of great value to you in choosing the credible green products and enhancing the Green performance of the buildings.

ParasuRaman R

Chairman, Green Products & Services Council

Founding Chairman, Indian Green Building Council.

Introduction

The Green Building movement spearheaded by the Indian Green Building Council (IGBC) has gained significant momentum and achieved green building footprint of 7.71 billion sq. ft. The green building footprint is expected to grow to 10 billion sq. ft. by the year 2022. This has created enormous demand for credible green products, materials and technologies.

To facilitate the Architects, Developers and builders to choose the right green products, materials and technologies for contribution, operation and maintenance of green buildings, CII has launched 'GreenPro' – an Ecolabel based on life cycle approach. Thus far more than 125 companies have achieved GreenPro Ecolabel for over 1800 of their products.

The Ecolabelled green products contribute significantly for enhancing the performance of Green buildings in terms of reducing resource consumption and enhancing the health and well-being of the occupants. These Ecolabelled products contribute to Green buildings in the following areas:

1. Energy Efficiency
2. Indoor Environment Quality
3. Materials and Resources
4. Water Management
5. Waste Management
6. Sustainable soils

This 'GreenPro' directory contains the details of the ecolabelled products, their green features and the contact details of the manufacturers. The Ecolabelled products are included from the following product categories:

1. Architectural Products
2. Boards, Panels, False Ceiling & Plaster
3. Carpet Tiles
4. Cement
5. Cleaning Chemicals
6. Construction Aggregates
7. Construction Blocks
8. Construction Chemicals
9. Consumer Products
10. Cooling Towers
11. Doors and Windows
12. Furniture
13. Ground Granulated Blast Furnace Slag (GGBS)
14. High Performance Glass
15. Indoor Air Quality Solutions
16. Innovative Green Building Technologies
17. Insulation
18. Paints & Coatings
19. Plumbing Fixtures & Sanitaryware
20. Ready Mix Concrete (RMC)
21. Solar Photovoltaic Module
22. Tiles
23. Waste Water Treatment Systems

Note: Refer the 'GreenPro' website for the certification standards for various product categories

Criteria for inclusion

The directory includes only 'GreenPro' certified products which are in validity period. GreenPro adopts a 'Life Cycle' based holistic approach for evaluating the products. The comprehensive approach ensures that there are clear measurable environmental benefits during its use.

GreenPro certification standards are developed for the product categories with the support of technical committees inviting key stakeholders. Products are assessed and certified based on the respective GreenPro certification standard.

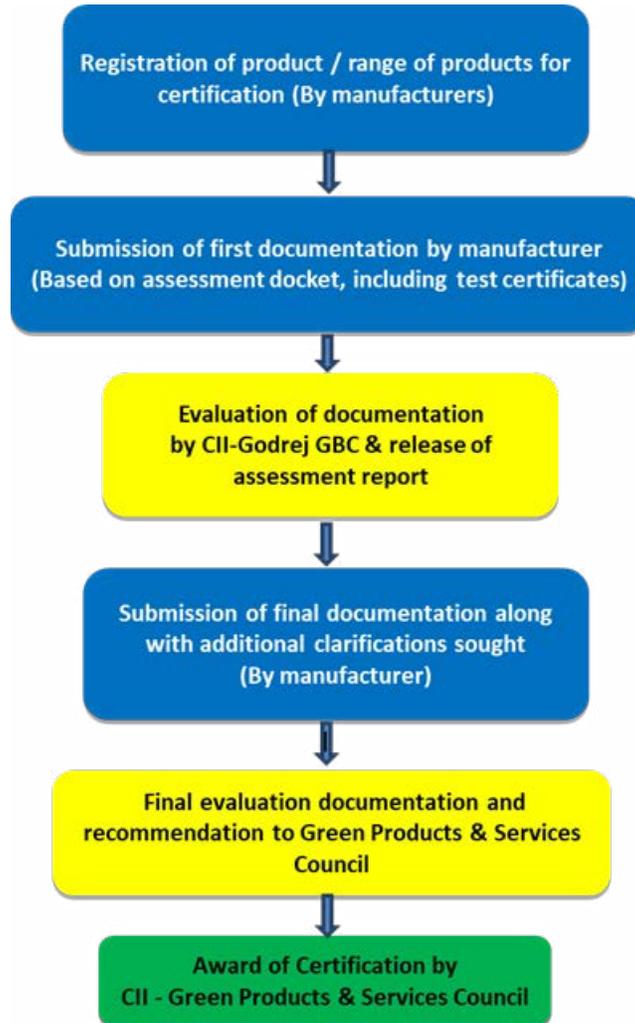

The following areas are assessed for a product to qualify as green:

- Product Design
- Product Performance
- Raw Materials
- Manufacturing Process
- Waste Management
- Life Cycle Assessment
- Product Stewardship
- Innovation

GreenPro certification process

Every product included in the directory have undergone the following process:

Validity of the Certification

GreenPro Certification is valid for 2 years from the date of award of the Certification for the product / product range. The validity of the certification for all the products is highlighted in the directory.

Benefits

GreenPro certification benefits both the end users such as Architects, developers, builders, green building consultants as well as the product manufacturers. The benefits are both tangible and intangible.

For Users

Some of the benefits for the users are highlighted as below:

1. Time and effort in carrying out due diligence in selecting a green product is saved
2. The user is assured of the performance of the product and equipment
3. Ensures Toxic and hazardous substances free products which in turn decreases “health and wellbeing” risks of the users
4. Improved product performance during use to reduce resource consumption and environmental impacts
5. Recognition and credits for achieving national and international Certification for the buildings

For Product Manufacturers

Some of the benefits of GreenPro Certification for the product manufacturers are highlighted below:

1. GreenPro Certification differentiates the Green product from the competition
2. Increases the market reach out with credible and precise information on the Green features of the products
3. Enables Green product Innovation
4. Increases resources conservation through enhanced energy efficiency, water efficiency, use of renewable energy, minimization of waste etc., during the manufacturing process and hence enables increase in profitability
5. Acts as a driver for achieving environment excellence
6. Complements National & International Green Building Certification Systems

Accreditation by Global Ecolabelling Network (GEN)

GreenPro Ecolabel is accredited by Global Ecolabelling Network (GEN) through **GENICES** – “GEN’s Internationally Coordinated Ecolabelling System”. Global Ecolabelling Network is a network of Ecolabelling Organisations that advocates for Type - 1 Ecolabels based on ISO 14024 standard and articulates their credibility.

The accreditation by GEN

October 4th, 2017

Date Issued

A 'Peer Review' has determined that the named organization operates the identified ecolabelling program in a competent manner and in conformance with the GENICES requirements.

Recognition by UN Environment

UN Environment has listed their 'Guidelines for Product Sustainability Information' on GreenPro Ecolabelling. The guideline includes the following aspects.

Principle – 1	Reliability
Principle – 2	Relevance
Principle – 3	Clarity
Principle – 4	Transparency
Principle – 5	Accessibility
Principle – 6	Three dimensions of Sustainability
Principle – 7	Behavior change and Long-term impact
Principle – 8	Multichannel and innovative approach
Principle – 9	Collaboration
Principle – 10	Comparability

UN Environment study reveals that GreenPro Ecolabelling is aligned with all the principles as part of the 'Guidelines for Product Sustainability Information'. A case-study developed by UN Environment on 'GreenPro' is enclosed.

Confederation of Indian Industry

Sector: Manufacturing Sector **Region:** Based in India, operates in India

The [Confederation of Indian Industry](#) (CII) works to support the growth of industry in India, partnering with industry and government through advisory and consultative processes.

Developed by CII, [GreenPro](#) – Green Product Certification is a product certification that helps consumers to make informed choices in the building sector. It is a seal of guarantee that the product bearing the GreenPro label is environmentally more sustainable throughout its life cycle.

GreenPro assesses ‘how green a product is’ based on a holistic framework, as well as proposing next steps to achieve excellence in environmental performance over time. The certification system guides manufacturers to showcase their products environmental performance and gain increased market reach in the green building sector.

Mindset

Life Cycle Thinking: GreenPro considers the following stages of the life cycle of the products: product design, raw materials, manufacturing process, product performance in the use phase, and at the end of life disposal / recycling. All stages are considered for awarding certification.

Hotspots Analysis: The GreenPro evaluation is based on a standard framework using life cycle approach and considering the most impactful stages within a product’s life cycle.

Mainstreaming sustainability: By highlighting possible improvements that lead to better environmental performance, GreenPro ultimately helps companies improve their products’ performance over time, while also encouraging them to apply this logic to other products in their portfolio.

Principle 1: Reliability

Gaining GreenPro certification requires third-party verification from the National

Accreditation Board for Testing and Calibration Laboratories (NABL) for test reports, while CII also verifies the environmental claims made during a site visit. GreenPro Certification is valid for 2 years from the date of award of the certification for the product. At the end of the validity period, the manufacturer needs to apply for the renewal of the GreenPro certification.

The GreenPro certification is a type I ecolabel, based on an accepted methodology as per ISO 14024 in the relevant scientific field.

Principle 2: Relevance

A product needs to comply with certain specific mandatory requirements, which vary depending on the product category. The mandatory requirements address relevant aspects of [each product](#) in areas that make a difference to its overall sustainability performance.

The GreenPro certification highlights product characteristics that are integral to the product, i.e. its function, materials or performance. Additional improvements above the regulatory requirements in India are requested.

This case study forms part of the project ‘[Testing the Applicability of the Guidelines for Providing Product Sustainability Information](#)’. The aim is to share a practical application of the Guidelines’ principles by companies and standard-setting organisations.

Principle 3: Clarity

Each certified product has a unique identification number, which makes it clear that the claim is only for the product at hand.

The respective company is entitled to use the GreenPro certification logo in all their promotional activities of the certified product, either on the packaging or the product itself. This enables the architects, developers, builders, construction engineers, and consultants to identify certified products and guides their purchasing decisions. Consumers can visit the website, enter the unique identification

number and check the validity of the certification. Certified products are easily recognized through the use of the GreenPro certification logo.

Principle 4: Transparency

Consumers can trace the information on the standard and the certification process

on the [website](#). A list of all stakeholders and bodies involved is also available publicly on the website, as well as a list of certified products and contact details of certified manufacturers.

With the information provided on the website, consumers are able to understand how and by whom the standard is developed. CII provides the evidence behind the certification, and the criteria utilized in the certification process.

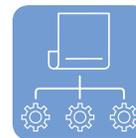

Principle 5: Accessibility

Consumers can identify certified products through the GreenPro logo. Environmental features that are relevant to the GreenPro standard are communicated to consumers via newsletters and promotional media.

Monthly newsletters, awareness programs, webinars and regular e-mails are offered to promote GreenPro and educate consumers about the certification and its benefits to the environment. The details of certified products, standards and contact details are readily available on the website.

Principle 6: Three Dimensions of Sustainability

Environmental: The GreenPro certification system evaluates environmental features for products based on various performance criteria grouped under the following modules: product design, product performance, raw materials, manufacturing process, waste management, life cycle approach, product stewardship and innovation.

Social: The certification encourages the product manufacturers to incorporate or implement measures that would result in health and wellbeing benefits for the building occupants. These measures include, for example, elimination of hazardous substances and reduction in volatile organic compounds (VOC) content in the products.

GreenPro considers primarily the environmental dimension of sustainability, although it also aims to encourage social benefits

Principle 7: Behaviour Change and Longer Term Impact

CII encourages behaviour change in the companies that want to be certified. After GreenPro's assessment, a report is provided for the companies with the aim of guiding them to adopt environmental measures across the product life cycle. The environmental impacts of the products are captured as part of the assessment report.

CII organizes workshops and develops activities targeted at creating awareness on sustainable procurement amongst architects, developers, builders, construction engineers, and consultants so that they can ultimately change their procurement practices. Product manufacturers are also involved in such awareness-raising initiatives.

This case study forms part of the project '[Testing the Applicability of the Guidelines for Providing Product Sustainability Information](#)'. The aim is to share a practical application of the Guidelines' principles by companies and standard-setting organisations.

Principle 8: Multi-Channel and Innovative Approach

CII employs multiple channels to reach out to various stakeholders through periodic webinars and awareness programs, regular newsletters featuring details of GreenPro certified products, conferences and training programs. The details of [all certified products](#) along with contact numbers and e-mail addresses are also available on the website.

GreenPro has a multi-channel approach for information dissemination that includes a website, newsletters, awareness and training programs and conferences. However, the product-level environmental performance is mainly communicated on the product itself through the label.

Cement is one of the products that can be certified by GreenPro.

Principle 9: Collaboration

The GreenPro standard is prepared through stakeholder consultation and the certification process is developed with the support of respective product committees formed under the aegis of the 'Green Products and Services Council' of CII. The participation of diverse stakeholders helps improve the public acceptance and trust of the standard process.

The product committee involves all major stakeholders of the respective product category, including product manufacturers, standard-setters, conformity bodies, architects and users. Each product committee is led by an external expert.

Principle 10: Comparability

This principle states that product comparisons should be used only where it really helps the consumer to make sustainable choices. In this standard, CII opted for not addressing this aspect.

This case study forms part of the project '[Testing the Applicability of the Guidelines for Providing Product Sustainability Information](#)'. The aim is to share a practical application of the Guidelines' principles by companies and standard-setting organisations.

GreenPro's MoU's with National and International Organisations

MOU Signing between IPA, IAPMO & CII-IGBC

Memorandum of Understanding between CII – Indian Green Building Council (IGBC), The International Association of Plumbing and Mechanical Officials (IAPMO) and Indian Plumbing Association (IPA) was signed during the flagship event of IGBC Green Building Congress on 5th October 2017.

IAPMO, IPA, and IGBC agree to work together on promoting water efficiency in building sector by promoting the use of water efficient plumbing fixtures and sanitaryware. As part of this, to help the end-users such as architects, developers, MEP consultants select water efficient products, GreenPro has developed and ecolabelling standard for water efficient fixtures with the support of IPA and IAPMO and various leading manufacturers, laboratories and Green Building stakeholders.

GreenPro Ecolabelling Standard on Water Efficient Plumbing Fixtures & Sanitaryware released during Green Building Congress 2019 by IPA, IAPMO & CII

MOU signing between Thailand Environment Institute and Confederation of Indian Industry

Memorandum of Understanding between GreenPro Ecolabelling Scheme – Confederation of Indian Industry (CII) and Thai Green Label Scheme – Thailand Environment Institute (TEI) was exchanged during the flagship event of IGBC – Green Building Congress on 27th September 2019.

GreenPro has a memorandum of understanding (MoU) with Thailand Environment Institute (Thai Green Label Scheme). The objective of MOA is to mutually recognise the Ecolabels of India (GreenPro) and Thailand. This mutual recognition aims at cooperatively promoting Green products and facilitate their productions in India and Thailand. This increases the export opportunities of certified products.

Caption: Exchange of MoU between Thai Green Label Scheme - TEI and GreenPro Eco-labelling Scheme - CII

Demand for Green Products

Leading Organisations Using GreenPro Ecolabeled Products

GreenPro ecolabelled products are widely used for construction by leading public and private organizations. The use of GreenPro ecolabelled products is specified by the builders, developers & project consultants etc., through the government tenders or green procurement guidelines. These are the testaments of demand and widespread recognition for GreenPro Ecolabelled products in various green projects.

Public Procurement:

Various Government tender documents have included GreenPro certified products as criteria for the selection of the products in the projects. Some of the Government organisations/institutions include:

- Chennai Metro Rail Limited
- College of Technology and Engineering, Udaipur
- Delhi Metro Rail Corporation Limited
- HLL Infra Tech Services Limited (Subsidiary of HLL Lifecare Limited, A GOI Enterprise)
- Hooghly Cochin Shipyard Limited
- IIT Kharagpur
- Management Development Institute, Murshidabad
- New Town Kolkata Development Authority
- Public Works Department – Government of Rajasthan
- Public Works Department – Government of West Bengal etc.

Private Procurement :

Leading Builders, Developers, Consultants, Specifiers & Green Building Stakeholders are demanding for GreenPro certified products for use in their projects. A few of these include:

- Amar Builders
- Augur Realtors Pvt. Ltd
- Avikam Buildcon LLP
- Bengal RBM Promoters Private Limited
- Brigade Group
- Conserve Consultants Pvt. Ltd.
- Fleur Hotels Private Limited
- Godrej Properties
- JRS Conbuild Private Limited
- K Raheja Realty P. Ltd. – K Raheja Corp
- L&T Construction
- Mahindra LifeSpaces
- Merlin Projects Ltd.
- Mondal Constructions Co. Ltd.
- Orbit Projects Pvt Ltd
- Renaissance Holding Developers Pvt Ltd
- Salarpuria Sattva – Sattva Group
- Savvy Infrastructures Pvt. Ltd. – Savvy Group
- Shiva Sai Infraa
- Skilltech Engineers & Contractors Pvt Ltd
- Solitaire Realty
- Tata Realty and Infrastructure – TATA Group
- Tejraj Infra LLP
- Uniqueshree Vinayak Land Homes LLP
- Vilas Javdekar Developers
- Vilas Javdekar Eco Shelters Pvt Ltd

Architectural Products

‘Architectural Products’

‘Architectural Products’ include interior and exterior architectural products made from aluminium and wood polymer composite. The products include grid system for panelling, trays for caballing, junction boxes, trap doors, pergola, gazebo, railing, WPC flooring, benches, etc. The products add aesthetic and ergonomic aspect to building use and are mostly made from recycled materials.

Benefits & Contribution to Green Building Requirements

The GreenPro certified products under this category leads to:

- Resource efficiency because of increased recycled content in the products
- Reduction in environment impact due to reduced use of virgin material
- Helps in gaining credits for achieving Green Building rating under the section ‘Materials and Resources’

Companies

The following companies have achieved ‘GreenPro’ certification for their products

- E3 Extrusion Inc
- Durlum India Pvt Ltd
- Greentek Plast
- Häfele India Pvt. Ltd
- Hunter Douglas India Private Limited
- IQUBX Pvt Ltd
- Shubh Composites
- Tata BlueScope Steel Pvt Limited

Durlum India Pvt Ltd

Validity: Dec 2022

About Manufacturer

durlum India Private Limited is a member of the German-based durlum Group of Companies, internationally known for its innovative design and expertise in the manufacturing of metal ceiling, wall claddings, lighting, and daylighting systems.

Built on the foundation of the “Make in India” initiative; durlum India has established a state-of-the-art manufacturing facility, attaining ISO 14001:2015 & RoHS certifications, and have cemented a reputation of quality and innovation through our world-class engineered solutions. Since setting up in 2008, the experienced and professional team located in Gurugram, India has now successfully executed more than 2000 projects in the region.

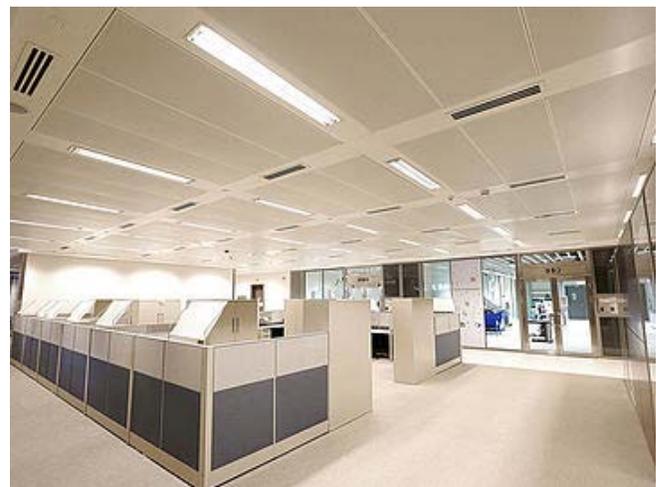

durlum’s metal ceilings, integrated ceiling-lighting solutions, and wall claddings are suitable for a versatile range of architectural applications including Airports, Railway stations, Health care centres, Office buildings, Shopping malls, Schools, Leisure facilities, Auditoriums, or Industrial Buildings. durlum can provide an appropriate and individual solution for any application. Solutions that make you feel at home.

Green Product Features

- Regional content to the tune of 95% in the raw materials procured
- Low VOC emissions due to the products being powder coated
- Low heavy metal concentration

GreenPro Certified Products

- Closed Metal Ceilings System - S1, S2, S4, S5, S6, S7, S8, S10, Loop System
- Open Metal Ceilings System - Starlam, Geo, Ticell, Enticell, Polylam Baffle, dur Solo
- Special Ceilings- Illuminated Ceilings; Loop Ceiling system; Fluid Ceiling System.
- Metal Wall Panels

E3 Extrusion Inc

Validity: Dec 2022

About Manufacturer

Based in Bangalore, E3 Wood is engaged in the production of wood plastic composites (Modified Wood or Natural waste Fiber). Extrusion products are developed using latest technology to form excellent quality Wood / Natural plastic Composite products. E3 Wood is developing New Green Products for wood alternatives with an objective of recycling, eco-friendly, green product, saving trees and environment.

Green Product Features

- Free from hazardous and toxic substances
- Use of Recycled content
- Use of Low VOC coatings
- Enhanced Acoustical performance

GreenPro Certified Products

- E3 Wood – WPC

Greentek Plast

Validity: Dec 2022

About Manufacturer

Greentek Plast was founded with the vision to bring sustainability in the construction industry. Its state-of-the-art manufacturing facility produces cost effective, high quality, durable and environmentally friendly plastic boards specifically for concrete formwork. Through its new life engineered plastic boards, it tackles today's two big global issues of mismanaged plastic waste as well as the excessive tree-cutting for plywood manufacturing.

Greentek Plast is a market leader in the manufacturing of highly engineered composite plastic formwork board in recent years. With 26 year experience in the construction industry, they always look towards qualitative, faster, economic and smarter way of application. The Research and Development team is dedicated towards developing alternative products to benefit the industry in terms of cost and time and simultaneously build a sustainable ecosystem.

Green Product Features

- Made of 100% recycled raw materials
- Absence of prohibited substance such prohibited flame retardants, heavy metals, phthalates, etc.,
- Use of 100% regionally sourced raw materials in manufacturing process
- Offers better acoustic performance and termite resistance

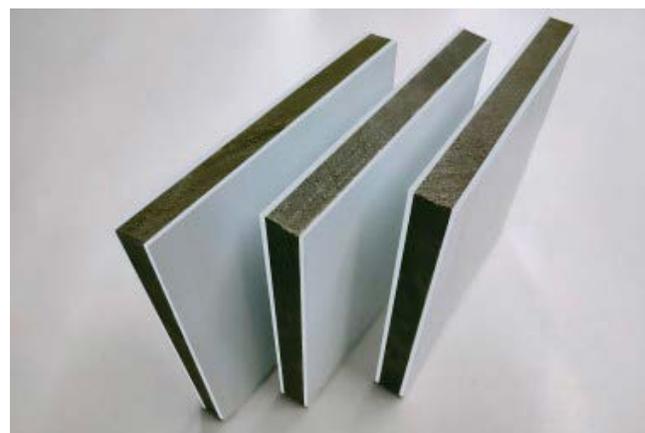

GreenPro Certified Products

- Engineered Composite Plastic Board

Greentek Plast

ISO 9001:2015 Certified Company

IQUBX Pvt Ltd

Validity: Dec 2022

About Manufacturer

IQUBX is a green building certified modular furniture and interior systems company with core philosophy of creating and marketing green building and sustainable products which are Innovative, Integrated and Intelligent. IQUBX takes up the initiative to transform climate change problems into sustainable solutions through design & development of innovative, integrated & intelligent green building product system for building & interior industry. IQUBX also specializes in designing of customized product solutions for its clients in the domain of interiors and building industry. Most important aspect of IQUBX products is the holistic design strategy which focusses on using 100% recycled Aluminium, with minimum number of multipurpose and multi-use versatile components to minimize the impact on environment. Incorporating the principles of agile product development, IQUBX strives to create meaningful and customer use driven products at minimum time and cost.

Green Product Features

- A well established green supply chain
- Mostly made from recycled aluminium
- Local procurement of scrap aluminium

GreenPro Certified Products

- Aluminium Access Ceiling Trap Doors (CTD-JB022, CTD-JB022H, CTD-JB023, CTD-JB023H)
- Aluminium Modular Floor Raceway (RW011, RW022)
- Aluminium Skirting (SK031)
- Aluminium Chair Rail (SK031CR)
- Aluminium Glazed Partition System (GP2510, GP1510)
- Baffle Ceiling System BFC1

Shubh Composites

Validity: Dec 2021

About Manufacturer

Established in the year 2013 at Rajkot (Gujarat, India), Shubhwood made a mark in the national as well as in international market by manufacturing, exporting and supplying qualitative assortment of Deck Tiles, Floor Decks, Wood Sidings, Wall Panels, Hollow Decks, Solid Decks and Wooden Tiles. The range is inclusive of WPC Flooring Decks, WPC Wall Panels and WPC Fencing

They export their products to Indian Subcontinent. Shubhwood follows client centric approach, transparent business dealings to fulfill the requirements of clients which has given them tremendous success.

Green Product Features

- Energy and water efficient manufacturing
- Water resistant and rot proof products
- Use of recycled HDPE and saw dust in WPC products
- Low waste generation during manufacturing

GreenPro Certified Products

- Benches
- Pergola
- Gazebo
- Flower Pots
- Decking Solution – Outdoor Flooring
- Wall Cladding – Interior and Exterior
- Railing

Tata BlueScope Steel Pvt Limited

Validity: Dec 2021

About Manufacturer

Tata BlueScope Steel is an outcome of a union between two global companies of world class reputation; Tata Steel and BlueScope Steel, Australia.

Tata BlueScope Steel operates in the SAARC region in the field of coated steel, steel building solutions and related building products. This progressive venture aspires to change the Indian architectural landscape with its world class products and solutions; and continues its vision of "Creating your new world in steel!"

Green Product Features

- Roofing sheets with high SRI value in some coatings
- Coating applied over the product is ultra low VOC and ROHS compliant.
- Regionally sourced raw materials > 90% (by weight)
- Zero Liquid Discharge facility

GreenPro Certified Products

- ZINCALUME® Steel
- COLORBOND® Steel

Boards, Panels, False Ceiling & Plaster

‘Boards, Panels, False Ceiling & Plaster’

This category includes boards, panels, false ceiling, plaster made from materials like gypsum, cement fibre, recycled plastic, metals and mineral fibre etc. Majority of the products are used for indoor applications. Hence, apart from resource efficiency, these products have undergone testing for compliance to **R**estriction **o**f **H**azardous **S**ubstances (RoHS), **V**olatile **O**rganic **C**ompounds (VOCs), Acoustic performance for enhancing health and well-being of the occupants.

Benefits & Contribution to Green Building Requirements

Products certified under this category contribute to

- Resource efficiency due to increased recycled content
- Improved indoor air quality due to RoHS compliance and low VOC content
- Enhanced acoustic performance and related comfort for occupants
- Helps in gaining credits for achieving Green Building rating under the sections ‘Materials and Resources’, ‘Indoor Environment Quality’.

Application

Roofing sheets, panelling work, architectural cladding, partition wall system, mezzanine flooring, false ceiling, furniture making, etc.

Companies

The following companies have achieved ‘GreenPro’ certification for their products

- Anutone Acoustics Limited
- Armstrong World Industries
- Deeya Panel Products (P) Ltd
- Everest Industries Limited
- India Gypsum Pvt Ltd
- Indowud Polymers Private Limited
- Ramco Industries Limited
- Sahyadri Industries Limited
- Saint Gobain – Gyproc Business
- Saras Plywood Products Pvt Ltd.
- Visaka Industries Limited

Anutone Acoustics Limited

Validity: Dec 2021

About Manufacturer

Anutone provides solutions with Tufbloc drywall systems that sport a metal frame, polyfibre infill and magnesium boards as skins. They boast very high ratings for water, fire, termite, impact and noise resistance. Anutone offers ceilings with virtually any surface finish, any core material which is their USP. Anutone also finishes the wall surfaces from top to bottom, side to side with functional panelling that match the decor with options in textures, fabrics, vinyls, wood, metal, cement

Green Product Features

- Offers high acoustic performance
- Noise Reduction Coefficient of 0.9
- Improves indoor environment quality (noise reduction)
- Elimination of hazardous substances such as flame retardants, ozone depleting substances etc,

Deeya Panel Products (P) Ltd

Validity: Dec 2022

About Manufacturer

The Establishment in the years 2009, Deeya Panel Products Private Limited, are the manufacturers and exporters of Brick Pallet, Paver Block Pallet and Recycled Plastic Sheet. To manufacture these products with quality norms, their experienced and talented professionals use top quality components and modern machines. They have a well-equipped and state of art infrastructure unit. Owing to this infrastructural facility, they have been able to offer premium quality and highly strength products to the clients within the estimated time frame.

Green Product Features

- Utilization of industrial waste: 'Aluminium and low density Polyethylene (LLDPE)
- Resource efficient manufacturing process
- Zero Waste Discharge manufacturing plant

Everest Industries Limited

Validity: Dec 2022

About Manufacturer

Everest is one of India's leading and fastest growing complete building solutions providers. Incorporated in 1934, Everest has a rich history in manufacturing of building materials and Pre-Engineered Steel Buildings. With the brand promise of delivering Strength, Speed and Safety to construction, Everest today offers a complete range of new age building products for roofing, ceiling, wall, flooring & cladding solutions and also manufactures Pre-Engineered Steel Buildings for industrial, commercial and residential applications. Its building products and solutions are available in more than 1,00,000 villages and 600 cities in India and also in over 35 countries globally. Everest has designed, manufactured and erected more than 2,000 Pre-Engineered Steel buildings across 275 cities in India. Backed by innovation, the Company has continuously introduced modern products & solutions over last eight decades to meet the contemporary requirements of the construction industry.

Green Product Features

- Improved product performance (Sound Transmission Class of 34)
- Use of sustainable materials to the tune of 23.8%
- Adoption of resource efficient manufacturing process to reduce embodied carbon
- Use of carbon neutral fuel to reduce carbon emission

Indowud Polymers Private Limited

Validity: Dec 2022

About Manufacturer

INDOWUD NFC Board, better known as the Natural Fibre Composite Board, is made from the composition of eco-friendly natural fibres & agro residuals, natural minerals & polyvinyl chloride, in addition to other fillers and additives. It is highly resistant to environmental influences and natural phenomena such as decay, corrosion, mould, fungal attacks and rot, besides being a termite-proof product.

Green Product Features

- Good acoustic/sound absorption (Sound Transmission Class of 40)
- Termite proof, waterproof, flame retardant (Class 1/A)
- RoHS compliant and lead free product
- VOC emission is below detection limit

GreenPro Certified Products

- Indowud Natural Fiber Composite

Saras Plywood Products Pvt Ltd.

Validity: 2021

senses
akustik+™

About Manufacturer

Saras Plywood Products Pvt Ltd was established in the year 2002 – vast experience of 18 years. They are a front runner company producing quality wood products like Plywood, Decorative Veneer, and Flush doors. Available ranges cover Commercial, Water-proof and borer proof requirements. Their products release low chemical and production waste is well treated. They are guided by a simple philosophy of adding more value-for-money.

Green Product Features

- It offers high acoustic performance resulting in superior sound absorption and prevents sound echoes
- Noise Reduction Coefficient of 0.75
- Elimination of hazardous substances such as heavy metals, PBBs & PBDEs

GreenPro Certified Products

- Senses akustik plus (Polyester Fibre Acoustic Panel)

Carpet Tiles

‘Carpet Tiles’

Carpet tiles are a durable, attractive and flexible flooring option that are ideal for a large number of commercial projects and can be adapted to the necessary shape avoiding wastage of resources. Carpet tile usage has gained significant traction in the recent times especially in the commercial arena and considerable momentum in consumer arena.

GreenPro enables the end users to choose carpet tiles which are manufactured resource efficiently and with locally sourced raw materials. It also ensures that carpet tiles used for interior applications are free from hazardous substances and VOC emissions.

Benefits & Contribution to Green Building Requirements:

- Low VOC emissions
- Elimination of hazardous and ozone depleting substances
- Contributes to green buildings through material conservation and resource efficiency

Application

- Flooring

Companies

- InterfaceFlor India Pvt Ltd.
- Welspun Flooring

InterfaceFlor India Pvt Ltd

Validity: Dec 2022

About Manufacturer

Interface entered the 21st century and delivered one innovation after another. In 2000 they redefined modular carpet with the introduction of Entropy® and the emerging i2® category of products. That same year they offered the first commercial carpet collection to use recycled nylon in the face fibre and a 100% recycled content vinyl backing layer. They continued experimenting with renewable and recyclable materials and introduced our glue-free installation system, TacTiles®. Meanwhile, our Cool Blue™ process allowed them to use a wider range of materials for their backing and become less dependent on petroleum. They also formally recognised their goal of zero environmental footprint as Mission Zero®, giving a name to the journey they began in 1994.

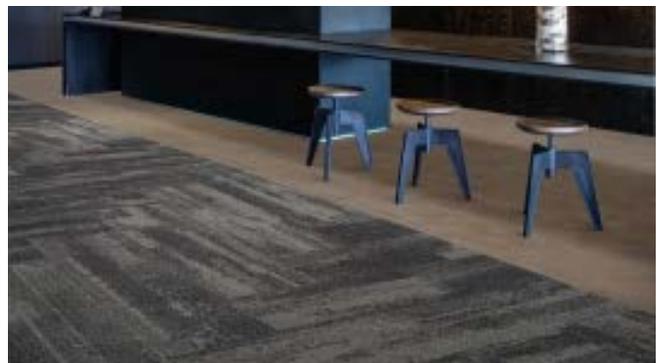

Green Product Features

- Minimal emissions (TVOC, formaldehyde, 4-PCH, etc.,) from carpets during its use
- Use of sustainable raw materials to the tune of 62%
- Restriction of hazardous substances in raw materials
- Adoption of resource efficient manufacturing process and utilization of onsite and offsite renewable energy
- Reduction in waste to landfill by takeback program and recycling process
- Implementation of environmental impact reduction measures identified by LCA assessment to reduce carbon footprint

GreenPro Certified Products

- Glasbac Carpet Tile
- Cushionbac Carpet Tile

Cement

Cement

Under Cement category, variety of cement products meant for making concrete, plastering, specialised applications such as water shield, corrosive resistant etc. have been covered. Green Buildings demand for utilization of only blended cements – Portland Pozzolona Cement (Fly-ash), Portland Slag Cement (Slag) and Composite Cements (Fly-ash & Slag). These cement products provide increased strength over a period of time compared to ordinary Portland cement.

Benefits & Contribution to Green Building Requirements

- Increased utilization of additives and hence reduced virgin material consumption
- Relatively higher strength compared to OPC though the setting time is higher
- Offers excellent water and corrosive resistance properties
- Helps in achieving Green Building rating by gaining credits under 'Materials and Resources' section

JSW Cement Limited

Validity: Dec 2022

About Manufacturer

Since its inception in 2009, JSW Cement entered the market with a vision to ensure a sustainable future for the country by producing eco-friendly cement. JSW Cement produces three varieties of cement: Portland Slag Cement (PSC), Ordinary Portland Cement (OPC), and Ground Granulated Blast Furnace Slag (GGBF). At Vijayanagar (Karnataka), Nandyal (Andhra Pradesh) and Dolvi (Maharashtra), JSW Cement utilizes slag from the JSW Steel plants to produce green cement. JSW Cement's flagship plant in Nandyal uses world-class technology (including the advanced Combi Finish Mode Roller Press Circuit and automated loading system) to manufacture cement. It also won prestigious awards for its energy-saving processes. With key markets in Telangana, Andhra Pradesh, Karnataka, Tamil Nadu, Kerala, Maharashtra, Orissa, and Goa, JSW Cement has been delivering high-quality products to several prestigious and large infrastructural projects in the southern and western regions of the country.

Green Product Features

- High addition of slag and flyash
- Utilization of alternate raw materials
- Initiatives taken for enhancement of mines life, water table management, restoration of spent mines, green belt development and biodiversity

Kesoram Industries Limited

Validity: Dec 2022

Kesoram Cement

About Manufacturer

Kesoram was founded in 1919 under the name of Kesoram Cotton Mills Ltd. From its humble beginnings as a cotton textile mill in Calcutta, Kesoram expanded into the production of rayon. Its first rayon plant was built in 1959, with a production capacity of 4,635 metric tons of rayon yarn per year. The spirit of entrepreneurship did not end there. Kesoram soon entered the tyre and cement industries. A change of name was needed to reflect the company's increasing portfolio of businesses. So, in 1986, it changed its name to Kesoram Industries Limited. Since then, Kesoram's operations have grown from strength to strength. Its reputation is recognized today by its listings on four global stock exchanges namely National Stock Exchange of India, Bombay Stock Exchange, Calcutta Stock Exchange Association, and the Société de la Bourse de Luxembourg. For over 40 years, Birla Shakti cement has helped laid the foundations of buildings everywhere. From schools and homes, to hospitals and skyscrapers, Birla Shakti helps build the dreams of people.

Zuari Cement Limited

Validity: Dec 2022

About Manufacturer

Zuari Cement is part of the worldwide Heidelberg Cement Group, a global construction material major. Zuari is committed to its customer's satisfaction. The culture of quality which prevails in Zuari Cement's manufacturing facilities is best exemplified in the process technology employed.

Advanced technology methods are used to ensure that a high level of quality is attained and sustained right through the manufacturing process. These high standards are constantly improved upon by an experienced and dedicated R&D team to attain performance oriented cement.

Green Product Features

- High usage of fly-ash
- Lower heat of hydration
- Improved water tightness
- Improved corrosion resistance
- Increased ultimate strength and durability

GreenPro Certified Products

- Zuari - Portland Pozzolana Cement (PPC)

Cleaning Chemicals

‘Cleaning Chemicals’

Cleaning chemicals are substances used to remove dust, stain, offensive odor and clutter on surfaces, avoid spread of dirt and contaminants and kill bacteria. This section covers restroom cleaner, multipurpose cleaner, facade cleaners, floor cleaners etc. Green cleaning chemicals are made of biodegradable and natural ingredients which reduce environmental impact throughout the life cycle including resource efficient manufacturing and minimal environmental impact during use and disposal. It has reduced risk of handling and storage.

Benefits & Contribution to Green Building Requirements

- Enhances indoor air quality and occupant health by reducing exposure to volatile organic compounds.
- Eliminates use of environmental pollutants to avoid water pollution due to effluent arising out of chemical usage.
- Absence of prohibited substances improves occupant health.
- Contributes in indoor environment quality of Green Buildings and helps in achieving Green Building rating.

Application

- Cleaning of floor, wall, glass, sink and toilets.

Ashok Chemicals

Validity: Dec 2021

About Manufacturer

Based in Mumbai, Ashok Chemicals is a company driven by innovation. The company's corporate philosophy is rooted in the principles of innovation.

The company's vision is to develop innovative and eco-friendly products; introduce consumers to cost-effective, time-saving, energy-saving, safe and environment-friendly products. The products are designed for the global market and are available at affordable prices. They continue to work towards manufacturing products to add value to the consumers' lives. Leading government organizations in India have applauded the company for its innovative products.

They manufacture high quality products at our plant and ensure safety and well being of people within and outside the company facilities.

Green Product Features

- Absence of heavy metals such as Lead, Cadmium, Hexavalent Chromium
- Low Volatile Organic Compounds
- Elimination of prohibited substances
- Sustainable packaging through take back and reuse program
- Lower environmental impact such as BOD, COD, eutrophication potential etc. when drained into water bodies

Proklean Technologies Pvt Ltd

Validity: Dec 2022

About Manufacturer

Proklean Technologies was born out of the passion of the founders towards green living and pollution free environment. Started in the year 2012, the founders first started with a single minded purpose of reducing pollution around them. They used a unique technology of harnessing the power of probiotic microorganisms to produce industrial and household products that replace harmful chemicals used in the industries today. The experience of the founders in the areas of biochemistry, probiotics and application research helped them quickly understand the potential of these tiny single celled organisms and soon the company was making chemical replacement products for leather, textile and hospitality industry. It further added products for the paper and pulp industry and launched its consumer products in the year 2020.

Green Product Features

- Absence of heavy metals such as Lead, Cadmium, Hexavalent Chromium
- Products have very low Volatile Organic Compounds (VOC)
- Hazardous and toxic substances are well below limits

Construction Aggregate

‘Construction Aggregate’

Under the category of construction aggregates, low density aggregates made of fly-ash has been certified. They can be used in lieu of conventional aggregate in concrete production.

Benefits & Contribution to Green Building Requirements

- Reduces dead weight of concrete structure by approximately 20 %
- Improves thermal insulation property to concrete
- Reduces micro cracks thereby enhancing durability of concrete
- Utilization of industrial waste reduces resource consumption and related environmental impacts
- Helps in achieving Green Building rating by gaining additional credits as part of ‘Materials and Resources’ section

Application

The low-density aggregates are used in construction of roads, buildings, bridges, structures, precast, tiles, etc.

Companies

- Indian Metals & Ferro Alloys

Indian Metals & Ferro Alloys

Validity: Dec 2022

About Manufacturer

Established in 1961 in the Eastern State of Odisha known for its rich natural resources, IMFA is India's largest, fully integrated producer of ferro alloys with 187 MVA installed furnace capacity backed up by 261 MW captive power generation and extensive chrome ore mining tracts. They are unique from the quality perspective due to comprehensive ISO 9001 Quality Management certification besides ISO 14001 Environment Management and ISO 18001 Occupational Health & Safety certification. They are recognised globally as a reliable and cost-competitive producer with a particular focus on customer satisfaction. Over the years, they have developed long standing relationships with multi-nationals like POSCO of South Korea, Marubeni Corporation and Nisshin Steel of Japan and leading stainless steel producers in China and Taiwan. Within India, Jindal Stainless and Shah Alloys are their leading customers.

Green Product Features

- High utilization of industrial waste fly-ash
- Green procurement by utilization of fly-ash
- Resource efficient manufacturing

GreenPro Certified Products

- Low Density Aggregate

Construction Blocks

‘Construction Blocks’

Construction blocks contribute significantly towards construction of energy efficient building envelope. Green buildings demand for construction blocks with better thermal performance which in turn will reduce the heat gain in the buildings by at least 3 – 5%.

GreenPro helps in identifying construction blocks with very low ‘U’ value (Improved insulation) and maximum industrial waste utilization by quantity. Products such as fly-ash blocks, recycled concrete blocks, Autoclaved aerated concrete blocks are certified under this category.

Benefits & Contribution to Green Building Requirements

GreenPro certified construction blocks contribute to:

- Reduced heat gain in buildings leading to reduction in energy consumption
- Enhanced thermal comfort in non-air conditioned buildings
- Overall reduction in weight and hence possibility of reducing steel use
- Increased utilisation of industrial waste leading to conservation of natural resources
- Contributes for gaining credits in achieving green building certification under ‘Energy efficiency’ and ‘Material and Resources’ categories.

Application

Suited for low and high-rise buildings for wall construction. An eco-friendly substitute for clay-based bricks.

NCL Buildtek

Validity: Dec 2022

About Manufacturer

NCL Buildtek Ltd is part of NCL Group and it comprises of ALLTEK & SECCOLOR divisions. Over period of time the product portfolio is expanded to AAC blocks, dry-mix mortars, tile adhesives & flooring segments. Today, NCL Buildtek Ltd has four successful business verticals under its realm; NCL coatings, NCL windoors, NCL wall solutions and NCL services. Through the coatings division, NCL manufactures putties, textures and wide range of emulsion paints. Through the windoors division, NCL manufactures colour coated GI windows and over a period started manufacturing ABS doors in collaboration with South Korea, UPVC doors & windows in collaboration with Veka AG, Germany, and high-end aluminium windows in partnership with Schuco, Germany. Through the walls division, NCL manufactures AAC blocks, dry-mix cement mortars & wide range of tile adhesives.

Green Product Features

- Reduces the dead load significantly that result in less usage of steel and concrete
- Light weight but higher compressive strength
- Offers low heat transmittance (U value: 0.95 W/m² K) through AAC Blocks
- Use of sustainable raw materials to the tune of 71.3%
- Use of renewable energy from onsite solar power plant through power purchase agreement

UAL Industries

Validity: Dec 2021

About Manufacturer

As one of India's leading construction material manufacturing company, UAL Industries Ltd. has, over the last three decades been meeting and fulfilling rural India's demand as the most ideal roofing solution for low-cost housing materials. UAL as an organization believes that 'Dynamism and innovation are prerequisites today to not to just build but to sustain in the future'.

Environmental sustainability is ingrained in UAL's endeavours and perhaps it is this idea which has led to the formation of KON_CRETE with a state of the art manufacturing unit for manufacture of Autoclave Aerated Concrete (AAC) blocks and panels.

Green Product Features

- High thermal resistance and thermal mass helps to maintain temperature, reducing usage of heating and cooling equipment
- Saves about 25% cost of installation and recurring costs of electricity
- Water and pest resistant
- Blocks and panels are lightweight with high dimensional accuracy and easy workability
- Blocks are extremely strong and durable despite being lightweight ensuring that the foundations of a building are lightly loaded
- Blocks provide excellent sound absorption with an Sound Transmission Class rating of 44.

Construction Chemicals

‘Construction Chemicals’

There are variety of construction chemicals such as admixtures, sealants, grouts, protective coatings, water proofing chemicals, adhesives, ready mix plaster etc. are used in construction of buildings. These chemicals affect the indoor environment quality and makes significant impact on health and well-being of occupants. There is a need for choosing the right construction chemicals without hazardous substances and volatile organic compounds.

Benefits & Contribution to Green Building Requirements

- Complies to restriction on Hazardous Substances (RoHS) requirements
- Very low/No VOC content and hence improves the indoor air quality
- Utilises industrial waste such as flyash/slag hence leads to reduction in resource consumption
- Enables award of credit in Green Building certification as part of ‘Materials and Resources’ and ‘Health and Well-being’ categories

Application

Block jointing mortar, adhesion for blocks, tiles, panels etc, admixtures for concrete making, waterproofing applications.

Green Build Products (I) Pvt. Ltd.

Validity: Dec 2022

About Manufacturer

The Company has been having a in-house R & D lab, and a quality control dept, from the day of inception of the company. Strong team of qualified technicians have been working with experienced consultants who are experts in different fields such as engineering, polymer chemistry, paint technology, Environmental sciences etc and have successfully developed world class technology for sustainable building materials.

Green Product Features

- Build Fast
- Green Grout
- Eco Render
- Green Repair
- Green Seal

GreenPro Certified Products

- High utilisation of recycled content: fly ash, slag
- Supplied as ready to use wet mix and doesn't require curing post application
- Meets GreenPro requirements for reduced heavy metal concentration and low VOCs

Hindalco Industries Limited

Validity: Dec 2021

About Manufacturer

Hindalco Industries Limited, a flagship company of the Aditya Birla Group (ABG), is an industry leader in aluminium and copper business. Hindalco's business is built on values and are guided by their vision to be a global leader in the metals and mining sector, excelling in creating value for stakeholders.

Established in the year 1958, Hindalco is the world's largest aluminium rolling company and one of Asia's biggest primary aluminium producers. Headquartered in Mumbai, Hindalco's mining and manufacturing operations are spread across nine states in India and the global footprint spans 50 units in 11 countries.

Green Product Features

- It has low Volatile Organic Compounds (VOC) - 9.4 g/l
- It has excellent workability and saves water & time during construction
- Low heavy metals concentration such as Arsenic, Cadmium and Chromium

GreenPro Certified Products

- TECHPLAST (Ready Mix Plaster)

Hindcon Chemicals Limited

Validity: Dec 2022

About Manufacturer

HINDCON CHEMICALS LTD. (Formerly known as Hind Silicates Pvt Ltd.) was formed in 2000, its chemical production roots date back to as early as 1947, with its parent company Hind Chemicals producing Sodium Silicate with an installed capacity of 1800 MT per Annum from its Dum Dum plant. As it now stands, the Hind Silicates factory at Jalan Industrial Complex is equipped with production capacity of 25000 MT per Annum, not to mention that more than 6 decades of concrete experience in the field. A full fledged laboratory conforming to the respective I.S. Standards has been set up, enabling the issue of Test Certificates as and when necessary. An active R&D wing enables a continuous product update, bringing the customers the highest grade of Sodium Silicate and its variants in the region. An environmentally friendly Company, Hindcon Chemicals take great care in preserving the surrounding by adopting environmentally safe methods of production.

Green Product Features

- Very Low VOC cleaning chemicals
- Free from hazardous and toxic substances
- Regional green procurement

Sinicon Controls Pvt Ltd

Validity: Dec 2022

About Manufacturer

Sinicon, established in 1994, has been contributing its share of knowledge in improving the living quality of people by way of providing them with superior quality products made on latest technology platform. Sinicon manufactures its products under three broad categories of water management, electrical/electronic and climate control. Sinicon products are manufactured under strict quality control and assurance systems and the processes are controlled through ISO9001-2008 standards apart from implementing in-house quality schemes and TQM practices

Green Product Features

- A substitute for sand in plastering and other applications
- Non-toxic and non-flammable
- Exceptional fire resistance with melting temperature of 1250 Deg.
- Offers low thermal conductivity

GreenPro Certified Products

- Sinicon PP Heat Proofing Plaster

UltraTech Cement Limited - Building Products Division

Validity: Dec 2022

About Manufacturer

In the endeavour to provide complete sustainable solutions to customers and to be 360 Degree building material destination, UltraTech Cement has established UltraTech Building Products Division. UltraTech Building Products division manufactures and markets technologically re-engineered products for construction and infrastructure industry.

Today the construction industry is demanding products which can replace conventional products as well as conventional methodology for fast track constructions. To meet this challenging demand, it offers a complete portfolio of end-to-end solutions, covering the entire spectrum of construction.

Green Product Features

- Construction chemicals have low volatile organic compounds
- Use of sustainable raw materials
- Ecolabelled construction chemicals are arsenic and mercury free products
- Reduction in hazardous and non hazardous waste disposal to landfill

Consumer Products

‘Consumer Products’

Consumer products refer to the set of products that are part of daily life of the end user, which unlike building products are not fixated. These products are an integral part of our life with the use being a mix of single time consumable with a repetitive need and reusable product.

GreenPro enables the end users to choose consumer products which are more eco-friendly and have less negative impact on the environment. It also ensures that these consumer products are free from hazardous substances and any other health hazards.

Benefits & Contribution to Green Building Requirements

- Increased sustainable product usage in daily life of end user
- Lesser impact on environment due to volume usage

Application

- Daily use
- Consumables

Companies

- Ashish Bags and Fashions Pvt Ltd
- Bayer Cropscience

Ashish Bags and Fashions Pvt Ltd

Validity: Dec 2021

About Manufacturer

Ashish Bags is a specialist in cotton and jute bag manufacturing. Over the past 14 years, they have established ourselves as a reliable company. Their customers include retail, fashion, food, hospitality, education, and health care companies. They have remained our partners since their inception and have grown with their reliable and consistent performance. In addition to manufacturing to their customers' specifications, they offer their designs and collections. Their goal is to meet all requirements to an absolute level of satisfaction, starting from sampling, production to delivery.

Green Product Features

- Use of azo colorant free dye in printing application
- Use of rapidly renewable materials to a tune of 81.8%
- Use of 100% regional sourced raw materials
- Resource efficient manufacturing process

Cooling Towers

‘Cooling Towers’

Cooling towers find their application in HVAC systems for cooling applications in both commercial and residential settings. The capacity of the cooling tower will vary depending on the cooling load requirement. Cooling towers can be resource intensive in terms of energy and water usage requirements.

GreenPro enables the end users to choose cooling towers which are manufactured resource efficiently and are less energy and water intensive.

Benefits & Contribution to Green Building Requirements

- Energy efficient
- Water efficient
- Effective heat rejection

Application

- HVAC application

Companies

- Paharpur Cooling Towers Limited

Paharpur Cooling Towers Ltd

Validity: Dec 2022

About Manufacturer

Founded in 1948, Paharpur is the world's largest manufacturer of process cooling equipment with exports to over 60 countries around the world. With the complete range of wet and dry cooling technology, Paharpur caters to every cooling need of industries the world over.

Paharpur has made significant contributions to industries around the world, driving production, enhancing capacities and overcoming challenges by leveraging the power of innovative engineering and expert manufacturing. Industrial giants around the world rely on Paharpur's cooling solutions & services and Often look to them to provide customised solutions in the face of critical cooling challenges.

Green Product Features

- Lowproach TM Cooling Tower with multiple existing installations of approach $\leq 1.5^{\circ}\text{C}$
- High Specific Flow (>350 LPM/kW)
- Use of sustainable materials to the tune of 14%
- Resource-efficient manufacturing process resulting in lower carbon emissions per Cooling Tower

Doors & Windows

‘Doors and Windows’

Doors and windows in a building, apart from their functional requirements, contribute significantly for heat gain. The heat gain is very significant if they are made of metals. Green Buildings demand for doors and windows with lower thermal conductivity. Green Buildings also encourage materials with high recycled content and in case of wooden products that are responsibly sourced. The coatings/paints used in these metal/wooden doors need to be with very low volatile organic compounds.

Benefits & Contribution to Green Building Requirements

- Improved thermal performance with overall heat transfer coefficients ranging from 1 to 3 W/m²k.
- Increased use of recycled content and hence reduced virgin material consumption
- Very low VOC emissions and hence improved Indoor Air Quality
- Contributes towards gaining credits related to energy efficiency, Indoor Air Quality, Materials and Resources categories of Green Building Rating.

Application

- Suitable for all building typologies.

Furniture

‘Furniture’

Green buildings demand for use of ergonomically designed furniture with very low emissions. Ergonomically designed furniture enhances the health and well-being of the users. The emissions from the furniture are on account of paints, adhesives, foams and coating materials. Products such as wood and non-wood based furniture are covered under this category.

Benefits & Contribution to Green Building Requirements

- Low concentrations of air contaminants such as formaldehyde, TVOC, total aldehydes and 4-phenylcyclohexene and hence improved indoor air quality
- Ergonomically designed and hence enhanced occupant comfort
- Utilises legally sourced wood and recycled/recyclable materials contributing lower environmental impacts
- Contributes in Materials and Resources, Indoor environment quality and Occupant comfort credits of Green Building certification

Application

- Suitable for interior spaces of all building typologies such as office, home, hotel, healthcare, and etc.,

Spacewood Office Solutions

Validity: Dec 2022

About Manufacturer

Established in 1996, Spacewood has played a key role in enhancing and enriching a lifestyle of dreams through our evolving furniture concepts. The state – of – the – art factory spreads over 15 acres of land and is located in Nagpur, the logistics hub of India. We are equipped with the most sophisticated European and Japanese technology and machines. With a skilled man force of over 1000 people, SOS manufactures up-to 10,000 kitchen cabinets, 36,000 bedroom sets, 2,500 customised wardrobes and 4000 complete kitchens every month.

Green Product Features

- More than 75% of material composition of particle board is FSC certified wood with industrial recycled residues and renewable material.

Ground Granulated Blast Furnace Slag

‘Ground Granulated Blast Furnace Slag’

Ground Granulated Blast Furnace Slag (GGBS) is a by-product of iron and steel manufacturing process. It is produced by quenching molten iron slag from a blast furnace which is, then, ground into fine powder. The granulated blast furnace can be used as an additive in ordinary Portland cement to produce slag cement and concrete. It can replace cement to the extent of 70% by weight. GGBS enables the concrete to gain strength over a period of time and offers excellent resistance to corrosion.

Benefits & Contribution to Green Building Requirements

- It is a product derived from post-industrial waste of iron and steel manufacturing process.
- Concrete with GGBS has a higher strength than concrete made of Portland Cement
- It reduces Ordinary Portland Cement (OPC) requirement in concrete making.
- It contributes in materials with recycled content credit of Green Building certification.

Application

- Supplementary cementitious materials in manufacturing of Concrete, Concrete Blocks, Portland Pozzolana Cement and Portland Slag Cement.

Companies

- JSW Cement Limited
- TATA steel limited

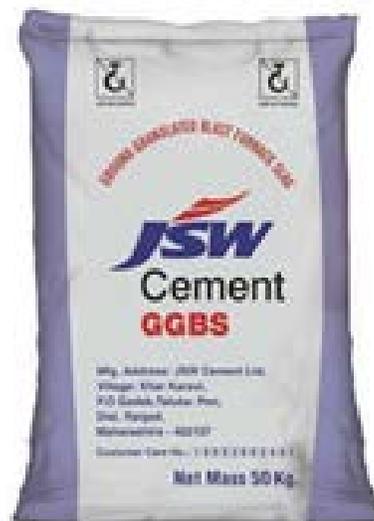

JSW Cement Limited

Validity: Dec 2022

About Manufacturer

Since its inception in 2009, JSW Cement entered the market with a vision to ensure a sustainable future for the country by producing eco-friendly cement. JSW Cement produces three varieties of cement: Portland Slag Cement (PSC), Ordinary Portland Cement (OPC), and Ground Granulated Blast Furnace Slag (GGBF). At Vijayanagar (Karnataka), Nandyal (Andhra Pradesh) and Dolvi (Maharashtra), JSW Cement utilizes slag from the JSW Steel plants to produce green cement. JSW Cement's flagship plant in Nandyal uses world-class technology (including the advanced Combi Finish Mode Roller Press Circuit and automated loading system) to manufacture cement. It also won prestigious awards for its energy-saving processes. With key markets in Telangana, Andhra Pradesh, Karnataka, Tamil Nadu, Kerala, Maharashtra, Orissa, and Goa, JSW Cement has been delivering high-quality products to several prestigious and large infrastructural projects in the southern and western regions of the country.

Green Product Features

Ground Granulated Blast Furnace Slag (GGBS)

- Replaces more than 60% of cement in Portland Slag Cement
- Reduces cement consumption in concrete
- Resource efficient manufacturing process

GreenPro Certified Products

- Ground Granulated Blast Furnace Slag (GGBS)

Tata Steel Limited

Validity: Dec 2022

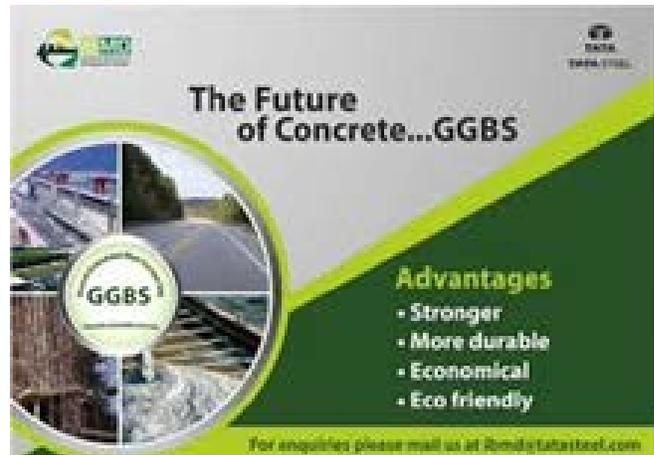

About Manufacturer

Tata Steel is currently the world's second-most geographically diversified steel producer. They are one of the few steel operations that are fully integrated – from mining to the manufacturing and marketing of products.

Continuous improvement in product and service portfolio, along with success in value creating initiatives for customers, allows Tata Steel to serve global markets. Today, they operate in 26 countries and have a commercial presence in over 50 countries with employees across five continents.

Green Product Features

- Concrete made by using GGBS is stronger, more durable and Eco-friendly
- Higher ultimate strength, low permeability, resistance to chloride and sulphite attacks
- Can be used as a partial replacement of Ordinary Portland Cement (OPC)

High Performance Glass

‘High Performance Glass’

In a building, glazing increases the natural lighting. At the same time, it also increases the heat gain which in turn increases the energy consumption in air-conditioning system. There is a need for balancing these both. Use of high performance glass for the fenestration helps in reducing the heat gain significantly and increasing the natural lighting.

GreenPro enables the end users to choose glass with credible performance parameters such as ‘U’ value, solar heat gain coefficient and visual light transmittance suitable for green building requirements.

GreenPro certified products also meets the requirements of Energy Conservation Building Codes (ECBC) for glazing.

Benefits & Contribution to Green Building Requirements

- Increases the natural lighting and reduces artificial lighting energy consumption
- Reduces the heat load and leads to reduction in energy consumption of air-conditioning system
- Reduces the capacity requirement of air-conditioning and hence the related capital cost
- Contributes to enhancement of energy efficiency of the building and achieve Green Building certification.

Application

- External facades, shade and all other architectural glazing requirements.

Saint-Gobain India Private Limited

Validity: Dec 2021

About Manufacturer

Saint-Gobain Glass India is a 100% subsidiary of Saint Gobain France, one of the leading float glass manufacturers in the world. It manufactures and markets solar control glass, fire resistant glass and other various types of float glasses in India from its World Glass Complex which is located at Sriperumbudur 40 km from Chennai which spread over 177 acres. Two float lines with a capacity to produce 1500 tons of float glass per day. Two automotive glass processing lines, one for laminated windshields for half a million cars and another for tempered glass for 1 million cars.

Green Product Features

- Low Overall Heat Transfer Coefficient (U) and Solar Heat Gain Coefficient (SHGC).
- Higher Visible Light Transmittance (VLT).

Indoor Air Quality Solutions

‘Indoor Air Quality (IAQ) Solutions’

Green Buildings contribute significantly for enhancing occupants’ comfort, health and well-being. Indoor air quality is one of the vital parameters for improving the health and well-being. Poor air quality in a building can lead to headache, nausea, eye irritation, vomiting which are called as sick building syndrome for the occupants

GreenPro enables the end users to choose products and technologies which contribute towards enhancing the indoor air quality.

Benefits & Contribution to Green Building Requirements

- Better indoor air quality to enhance wellbeing of occupants by limiting contaminants such as particulate matter, microbial count etc.
- Use of IAQ solutions in buildings can lead to award of credits towards ‘Indoor Environmental Quality’ aspect in green building ratings

Application

- HVAC systems
- Indoor environmental Quality related applications

Companies

- Aeropure UV Systems Pvt. Ltd.
- Camfil India Private Limited
- Fytorem
- Honeywell
- Johnson Controls (I) Pvt Ltd

Aeropure UV Systems Pvt. Ltd.

Validity: Dec 2021

About Manufacturer

Aeropure pioneers in manufacturing of metal halide and ultra violet lamps for improving Indoor Air Quality (IAQ) and energy efficacy in centrally air-conditioned spaces. Aeropure UV Systems Pvt Ltd is focused on delivering solutions for air quality & power saving, based on Ultra Violet germicidal technology to the Indian and International Markets, with wide ranging applications in Indoor air quality, energy conservation of air conditioning systems and for Germicidal disinfection of Indoor Air and Surfaces.

Green Product Features

- WATMIZER UVGI and DUCT ZAPPER UVGI system are certified as Innovative products under 'GreenPro'
- Reduces energy consumption of AHUs
- Improves the Indoor Air Quality environment

Bonphul Air Products Pvt. Ltd.

Validity: Dec 2021

About Manufacturer

Bonphul Air Products is a New Delhi-headquartered organisation that aims to be the World's Most Comprehensive Indoor Air Quality (IAQ) Company. Bonphul makes the entire range of products required for total Indoor Air Quality (IAQ) management: oxygen optimizers, air purifiers, AHUs, ventilation systems, fresh air systems. Started in 2017, Bonphul has successfully in attracted top-notch talents on board, from across the industry.

Green Product Features

- Enhancing indoor environment quality (IEQ) through increasing oxygen level
- Works on the pressure swing adsorption technology
- Oxygen with purity of 70 – 85% is supplied to occupied space

GreenPro Certified Products

- Oxygen Optimizer

Camfil India Private Limited

Validity: Dec 2022

About Manufacturer

Camfil APC is a division of Camfil, headquartered in Stockholm, Sweden, and is a worldwide air filtration company. Camfil has filtration divisions that specialize in HVAC filters, HEPA filters, cleanrooms, gas turbine intake filtration, hospital filtration and carbon odor filters. With offices and factories in practically every region of the world, Camfil can take care of any air filtration needs.

Camfil APC's goal is to be green, starting with the environmental benefits of the products. They help customers go green by stopping thousands of different pollutants from entering the workspace air from the outside environment. They build their equipment to last, so less waste is created over time. They use an environmentally friendly powder painting process so no VOCs are emitted.

At Camfil APC, they take pride in the outstanding line of products. From dust and fume collection to mist extraction, a wide variety of applications are covered. In addition to collectors, a full range of filters are offered as replacements for their current collector line, as well as aftermarket replacement filters for competitor collectors.

Green Product Features

- Reduces efficiently air contaminants such as PM2.5
- Enhances occupant wellbeing, health and safety
- Can be used for pre-filtration, air conditioning, housing ducts, diffuser applications

Honeywell

Validity: Dec 2022

About Manufacturer

Honeywell invents and manufactures technologies that address some of the world's most critical challenges around energy, safety, security, productivity and global urbanization. They are uniquely positioned to blend physical products with software to support connected systems that improve buildings, factories, utilities, and aircraft, and that enable a safer, more comfortable and more productive world. Their solutions enhance the quality of life of people around the globe and create new markets and even new industries. Buildings that use Honeywell's solutions are smarter and more versatile. Their building-automation technologies can be found in more than 10 million buildings, where they drive value for owners and occupants.

Green Product Features

- Reduces PM2.5, air contaminants efficiently
- Enhances occupant wellbeing, health and safety
- Improves cooling coil performance thereby reducing energy consumption
- MERV 14 Rated Air Cleaners

Magneto Environmental Groupe

Validity: Dec 2022

About Manufacturer

Magneto Cleantech invents and popularizes technologies to tackle the problem of poor indoor air quality in developing nations. They focus on making clean air accessible to everyone, whether in homes, offices or buildings. By pushing the limits of engineering, they are able to build the highest quality of products that exhibit extraordinary performance. They take the route of driving innovation through strong research fundamentals, while ensuring that the products adhere to rigorous standards of safety, compliance and quality. They have successfully commercialized a proprietary way of purifying the indoor air that is fundamentally superior to current methods – a central air cleaning-based system for large spaces that integrates with new or existing air conditioning equipment. They have built a diverse range of air purification products based on this patent pending technology for dust (PM 2.5) and infection control. Magneto Central Air Cleaner is one such manifestation of unparalleled air purification performance. This certified healthy air system has been meticulously engineered to protect people and their assets.

Green Product Features

- Reduces PM2.5, and indoor air contaminants efficiently
- Enhances occupant wellbeing, health and safety
- Offers minimum pressure drop
- Electrocutates filtered microbes

Sterling & Wilson Pvt. Ltd

Validity: Dec 2022

About Manufacturer

Sterling and Wilson is an excellent example of how the Shapoorji Pallonji family has nurtured long term associations with its business partners. The Mistry and Daruvala families have been partners in Sterling and Wilson for 3 generations. This partnership will only grow stronger, as the 4th generations of both families have recently joined the business. From being a company that was mainly focussed on doing MEP projects in India, Sterling and Wilson over the past 5 years has set up global operations in businesses of DG sets, Gas based power plants, Waste to Energy, Turnkey data centers, Transmission & Distribution and Solar EPC. With its recent foray into Wind and Energy Storage.

Green Product Features

IAQUARE – Indoor Air Quality Solutions

- Decontaminates bacteria, mould, fungi, viruses, VOC's and formaldehyde
- Improves cooling coil performance and hence reduces energy consumption in AHUs

IAQUARE – Indoor Air Quality Analyser

- IOT Based Real time monitoring system for Thermal Comfort and Indoor Air Quality Parameters.
- IAQ Analyzer enables demand based ventilation resulting in energy saving.
- The application provides complete analysis and recommendation to maintain Indoor Air Quality.

Eden Innovations

Validity: Dec 2022

About Manufacturer

Eden Innovations is an innovative technology company, is creating a revolution through sustained pollution control by offering a number of innovative solutions. Their OptiBlend solution allows conventional diesel engine to run on natural gas as its primary fuel without modifying the engine or the current diesel fuel system. This results in lower fuel costs, lower emissions, and increased runtime.

Green Product Features

- Natural Gas fuel substitution For DG sets
- Fuel substitution up to 70 %
- A retrofit solution without major modifications
- PM emissions below 150 mg/m³

Ecorain Systems India Pvt. Ltd.

Validity: Dec 2021

About Manufacturer

Eco-Rainwater Solutions systems has focused over the years on supplying Modular Tank and drainage Cells, in keeping with “turnkey” needs for developers and government. We are now able to supply our new Separator screens to be installed “in situ” build manholes, before water reaches our Modular Tanks.

Vikas Industries are Manufacturers, Exporters & Leading Suppliers of EcoRain Tank Single Module in India.

Green Product Features

Ecorain Water Harvesting Modular Tank System

- Higher volume of storage capacity i.e. 97 % of system occupied volume for storage
- Use of recycled plastic to the tune of 100 %
- HS 25 load bearing capacity

Ecorain Drain Cells

- Storm rain and drain water management
- Restricts the entry of debris into drain and prevents clogging

Furaat Earth Pvt. Ltd.

Validity: Dec 2022

About Manufacturer

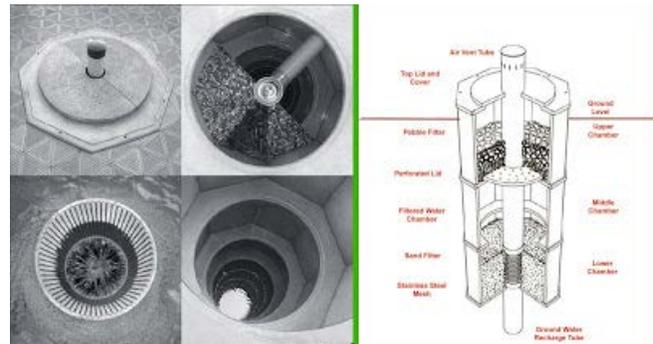

Furaat, a design lead company was setup by entrepreneur brothers Habil and Yusufi Attarwala. The company is engaged in providing rainwater harvesting solutions. The solutions are in the form of precast modular system that can adapt itself to various site condition and are highly reliable and efficient. The system filters rainwater that can be later used for various water requirements. Systems are installed across the nation ranging from individual residences, farm houses, urban townships, institutes and major industrial plants.

Green Product Features

- Pre-cast modular system for collection and filtration of rain water/stormwater
- Unique design for easy transportation, assembly and relocation.
- Increases the rain water harvesting

GreenPro Certified Products

- Modular Step Well

Greenrich Grow India Pvt Ltd

Validity: Dec 2022

About Manufacturer

Greenrich Grow India Private Ltd is into a new and time tested concept of recycling waste with Fungal Inoculum that are important as decomposers and in retaining nutrients in the soil. They strive to create a better environment for future generations. Greenrich Grow India private limited is a pioneer in bringing both residential and commercial waste management organic composters into the Indian market. Focusing more on aesthetics and efficiency for residential complexes and commercial establishments, the company creates a niche for itself in the wet waste management domain.

Greenrich Grow India Private Ltd is a waste management social enterprise that is moving India's solid waste sector to models that are simultaneously environmentally and financially sustainable. They offer professional waste management and processing services to households, Community composting for Residential apartments and Institutional clients like Schools, Colleges, Offices, Hotels, Restaurants, Canteens, Factories, etc.

Aerobic Composters @ MyGreenBin

Greenrich Home Composters

- GRC 25 PP - 25ltr: Digests 1/2 kg of waste per day
- GRC 50 - 50ltr: Digests 1 kg of waste per day
- GRC 120 - 120ltr: Digests 3 kg of waste per day

Greenrich Community Composters

Godrej & Boyce – Electrical Division

Validity: Dec 2022

About Manufacturer

Godrej Electrical & Electronics, a part of Godrej and Boyce group is recognized as one of the leading technology solution providers in India. This division basically caters to the needs of Indian and global customers in the area of energy and environment related issues with complete installation and maintenance. If the Godrej group stands as a well-oiled machinery unit, then they are the disciplined crew that keeps it in shape. With rapid infrastructural growth, Godrej sensed the need for Green Business set-up and that's how the Electrical and Electronics division came into existence. They provide all types of engineering services in the area of electrical, electronics, compressed air technology, busbar systems, instrumentation, and telecommunication & automation technology.

Green Product Features

- Retrofit solution for enhanced energy efficiency in compressed air systems for industrial application
- Supplies air at optimum pressure after sensing the demand

GreenPro Certified Products

- ControlAiR™ IFC

RUR Green Life Pvt Ltd

Validity: Dec 2021

About Manufacturer

RUR's Green Life offers decentralized and sustainable waste management solutions to reduce the environmental harms of landfill and toxic waste. RUR Green Life was started from a serious need to manage waste in Mumbai more effectively. RUR have developed a solution that is innovative, easy and affordable. One of its major advantages is that it's compact and manages 60 % of the waste on-site, which is really necessary for a city that is as cramped up as Mumbai. Overall RUR's solution recycles 90 percent and only dumps 10 percent. In the last year and a half we have developed a new bio-composting product and have applied for a patent.

Green Product Features

- It converts effectively biodegradable waste into nutrient rich compost.
- Innovative air vent design to achieve 100% aerobic composting.

GreenPro Certified Products

- GreenGold Aerobic Bio-Composter

Savita Polymers Limited

Validity: Dec 2021

About Manufacturer

Savita was founded in 1961 with its Research and Development Department was setup to be the first of its kind in the private sector oil industry in India to be recognized by the Government of India's Department of Science and Technology. Savita Polymers Limited was incorporated as a group company to manufacture Polymer Based Compounds, Cable Filling Compounds and Micro and Oxidised Waxes and an entire range of Automotive and Industrial Lubricants.

With over 40 years in the business of designing dielectric fluids for Transformers, Savita has crafted Biotransol, to not only protect the environment but also significantly increase the life and performance of a transformer.

Green Product Features

- Biodegradable and non corrosive dielectric fluid
- Non toxic and eco-friendly to aquatic life
- Minimizes ageing of transformer by enhancing life of solid insulation material

GreenPro Certified Products

- bioTRANSOL-HF

TurboTech Precision Engineering Pvt. Ltd

Validity: Dec 2021

About Manufacturer

TurboTech is one of India's leading Turbo machinery, and Mechanical Engineering Company. Today, TurboTech looks back to a legacy of 25 years when it made a humble beginning in the year 1989 in the city of Bengaluru, India, beginning with an in-house prototype development of first ever indigenous Gas turbine models of 50 KW and 500 KW. Today TurboTech has developed a range of steam Turbines best suiting the process industry.

Green Product Features

- Energy Conservation Turbine has been utilized for generating power in lieu of pressure reducing station for producing low pressure steam and meeting the process steam requirements
- Power generation efficiency of turbo-alternator is ranging from 80% to 90%.
- Isentropic efficiency of energy conservation turbine is ranging from 45% to 80%

Insulation

'Insulation'

In a building, walls and roofs contribute to significant heat gain which in turn leads to increase in air-conditioning requirement and related energy consumption. The heat gain through walls and roofs can be reduced by providing insulation. There are variety of insulation materials available in the market with wide range of insulating properties.

Thermal conductivity of the insulating material is very critical for reducing the heat load. These materials should also be fire resistant. GreenPro enables the end-user to choose insulation materials with low thermal conductivity ranging from 0.03 – 0.04 W/mk

Benefits & Contribution to Green Building Requirements

- Reduces the heat gain in a building and hence energy consumption in air-conditioning
- Free from prohibited flame retardants and hazardous substances
- Reduces the material consumption through increased utilization of recycled content.
- Contributes to enhanced energy efficiency and helps in achieving green building rating

Application

- Suitable for building envelope (walls and roof) and HVAC system

Companies

- Berger Paints India Ltd.
- Natural Insulation Co Ltd
- Polybond Insulation Pvt. Ltd.
- ROXUL ROCKWOOL Insulation India Pvt. Ltd
- Rockwool India Private Limited

Berger Paints India Limited – ETICS Division

Validity: Dec 2021

About Manufacturer

The driving forces of Berger Paints - reflect the very spirit of its founder Lewis Berger - who laid the foundations of brand Berger way back in 1760 in the UK. With modest beginnings in India in 1923, today, Berger Paints India Limited is the second largest paint company in the country with a consistent track record of being one of the fastest growing paint companies, quarter on quarter, for the past few years.

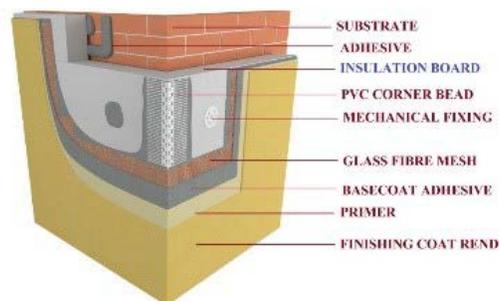

Extending their line of service, Berger Paints have launched their ETICS division that provides an end to end service of walling insulation in the year 2018.

Green Product Features

- Thermal insulation resulting in reduced heat flow from building envelope
- Use of raw materials with recycled content
- Absence of hazardous substances

GreenPro Certified Products

- Berger ETICS with Mineral Wool
- Berger ETICS with XPS Board
- Berger ETICS with EPS Board

Natural Insulation Co Ltd

Validity: Dec 2022

About Manufacturer

Natural Insulation Co. Ltd. is based out of Thailand and manufactures Enviro spray 300 – Sprayed Cellulose Insulation at their factory. Their key distribution and application partner in India is InfraMart RealTech India Pvt. Ltd, which is an Infrastructure Company, founded in 2009 by a group of Architects, Civil and Facility Management Professionals to give a new dimension to Infrastructural Development domain. They are Team of Architects, Civil Engineering Professionals and Interior Designers who work from concepts and initial sketch design to the final handover of the project. The Company has grown to execute some of the finest and prestigious infrastructure projects like Corporate workplaces, Commercial Buildings, Industrial facilities, Customized Warehouse's, Retail, Small Irrigation Projects and many more.

Green Product Features

- Cellulose based insulation with high recycled content >80%
- Good thermal insulation : Thermal conductivity : 0.035 W/mK
- Retrofit solutions for commercial, residential and industrial use

GreenPro Certified Products

Polybond Insulation Pvt. Ltd.

Validity: Dec 2022

About Manufacturer

Established in 1995, Polybond Insulation Private Limited is one of the largest Rockwool Manufacturers in India. They specialize in the manufacture of thermal Insulation material, acoustic insulation material and fire-retardant materials. Since inception, they have succeeded in carving a name for it in the insulation products and have built a solid client base in the industry.

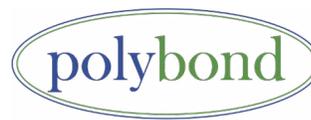

The group has one of the largest manufacturing capacity in India with an annual production capacity of 32000 MT, thereby catering its products and services to various industrial sectors across country. 'Polybond' is an ISO 9001:2015 certified company and its workflow is defined as per ISO guidelines.

Green Product Features

- Thermal insulation resulting in reduced heat flow from building envelope
- No heavy metal and flame retardants presence
- Absence of ozone depleting and global warming substances

Paints & Coatings

‘Paints & Coatings’

Selection of paints and coatings for the building interiors is critical for enhancing the indoor air quality and occupants’ health and well-being. Paints with very high Volatile Organic Compounds (VOCs) and hazardous substances can have significant ill effects on human health. Some of the hazardous substances such as mercury, lead, hexavalent chromium etc. are carcinogenic.

Green buildings demands use of very low VOC paints and paints that are complying to RoHS (Restriction on Hazardous Substances) guidelines. GreenPro enables the end-users in choosing paints that contribute to enhancing indoor air quality thereby enhancing health and well-being of the occupants

Key characteristics of GreenPro certified paint products are:

1. Very low or near zero VOC emission
2. Compliant with RoHS requirements
3. Non-toxic and non-hazardous

Benefits & Contribution to Green Building Requirements

- Very low VOC (or) Near zero VOC leads to improvement in Indoor Air Quality
- Improves the occupants health and well-being
- Helps in achieving green building rating by contributing to indoor air quality

Application

- Interior painting
- Exterior applications
- Heat reflective coatings
- Building surface protection

UltraTech Cement Ltd – Birla White

Validity: Dec 2022

About Manufacturer

Birla White, the leading white cement brand in India, has positioned itself as the “Whitest White Cement”. Birla White commenced production of white cement in 1988. Since then, the consumer has been exposed to the endless possibilities of applications with white cement. Birla White developed and introduced a slew of innovative, white cement-based surface finishing products.

The current portfolio includes WallCare Putty, Levelplast, GRC and Textura. Among them, they facilitate care for walls and augment interior appeal.

Green Product Features

- Environmentally friendly products with low Volatile Organic Compounds
- High recycled content
- Heavy metal content within limits

GreenPro Certified Products

- Birla White Wallcare Putty
- Birla White PreCote
- Birla White Textura
- Birla White Repaint Putty
- Birla White UltraPaint
- Birla White Extocare
- Birla White Level Plast
- Birla White Excel Putty
- Birla White Water Seal Putty

Plumbing Fixtures and Sanitaryware

‘Plumbing Fixtures and Sanitaryware’

Plumbing fixtures and Sanitaryware mentioned here refer to various water outlets in a building that include water closets, urinals, shower heads, lavatory faucets, sink faucets, various water sprays etc. .

GreenPro enables the end users to choose fixtures which are water efficient and are manufactured resource efficiently and with locally sourced raw materials. It also ensures that fixtures used are free from hazardous substances.

Benefits & Contribution to Green Building Requirements

- Use of high efficient, low flow water fixtures
- Contributes to green buildings through material conservation and resource efficiency

Application

- Water related applications

Companies

- CERA Sanitaryware Limited
- Euronics Industries Private Limited
- HSIL Limited
- Multiversal Industries Private Limited
- Sloan India Private Limited

CERA Sanitaryware Limited

Validity: Dec 2022

About Manufacturer

Style; Innovation; Leadership are The three words that capture the essence of CERA Sanitaryware Limited, India's fastest growing company in the segment.

Keeping the needs of the modern customer in mind, CERA opens the doorway to the world of style. An extensive product portfolio that includes high end showers, steam cubicles, and whirlpools, besides sanitaryware and faucets, has made CERA the primary choice of customers looking for stylish products in a contemporary lifestyle. CERA's constant innovations have given several path breaking contributions to the industry. Some of its innovations have become benchmarks for the industry—like water-saving twin-flush coupled WCs, 4-litre flush WCs, and one-piece WCs.

Advanced technology has been the forte of CERA and its state-of-the-art manufacturing plant has been following the highest standards of quality with an emphasis on sustainability since its inception in 1980.

Green Product Features

- Absence of heavy metals such as Lead, Cadmium, Hexavalent Chromium
- Use of regionally sourced and manufactured raw materials in manufacturing process.
- Use of raw materials with recycled content in manufacturing process
- Reduces building water demand and results in minimal energy required for treatment
- Optimised flow rates for water conservation

Euronics Industries Private Limited

Validity: Dec 2021

About Manufacturer

Euronics was founded in 2002 with a single purpose of offering great innovative products & services. The idea was to capture the white space offered in the public washroom automation accessories segment by the fast-growing Indian IT and hospitality Sector. Today, Euronics is one of the largest selling public washroom automation accessory brand in India.

In 2017, Harrington Carpet Tile was launched in collaboration with the Japanese company. They identified some critical challenges that the market is facing, and solved these problems with the help of inventory management & virtual reality technology.

Today, Euronics is amongst top Indian players in the white space with a significant presence across the IT sector, hospitality, commercial building, airports, industries and retail space.

With over 15 PAN India offices, 4 International offices & 225 + strong workforce, Euronics is a preferred brand to almost every fortune 500 company & leading Indian corporations.

They are working with a vision to grow through continuous product innovation, & the use of technology in all their processes.

Green Product Features

- Reduces flush and flow water demand of built environment
- Effectively controlling the urinal and faucets operations by sensing human movements
- Low water flow rate in urinal and faucets

GreenPro Certified Products

- EU40E Sensor Urinal Flusher Recessed
- EU07BE Sensor Urinal Flusher Recessed
- ET 04 Sensor Tap
- ET 08VS Sensor Tap

HSIL Limited

Validity: Dec 2021

About Manufacturer

Set up in 1960 as Hindustan Twyfords Ltd, with a technical collaboration with Twyfords UK, to introduce vitreous china sanitaryware in India. The company was subsequently renamed Hindustan Sanitaryware and Industries Limited in 1969 and HSIL Limited in 2009.

HSIL Limited is among India's top 500 companies as listed in the 'Fortune India 500' 2018 list. Currently, HSIL has four distinct business segments, namely the Building Products Division (BPD), Consumer Products Division (CPD), Retail Division and Packaging Products Division (PPD).

HSIL is committed to continuous improvement in their products and services through innovative technology, meaningful human resource development, installation of quality management system of national/international standards and reviewing quality objectives for superior customer values and aspirations.

Green Product Features

- Absence of heavy metals such as Lead, Cadmium, Hexavalent Chromium
- Contributes to water savings upto 30% through water efficient products
- Reduces building water demand that result in less grey water generation results in minimal energy required for treatment

GreenPro Certified Products

Multiversal Industries Private Limited

Validity: Dec 2021

About Manufacturer

Multiversal Industries Private Limited was established in 2017 with the vision of being a reliable organization engaging in manufacture of qualitative range of products. They are also one of the leading companies of this highly commendable range of products. The team of experts maintain a vigil on the quality of the products. Every single piece of work is ensured with proper quality assurance. Since their inception in 2017, they are continually improving the quality to serve clients better. Use of modern technology, industry standards, timely and quality deliveries, experienced workforce are their USPs.

Green Product Features

- Eliminates water required for flushing
- Optimize cost of plumbing accessories
- Conserve resource used for treating waste water

GreenPro Certified Products

- Vyuh™ - Waterless Urinals

Sloan India Private Limited

Validity: Dec 2022

About Manufacturer

Sloan is at the forefront of the green building movement and provides smart, sustainable, and hygienic restroom solutions by manufacturing water-efficient products that promote wellness in commercial, industrial, and institutional markets worldwide.

Sloan helps customers worldwide to meet the water and energy challenges of growing businesses, municipalities and communities.

Water Connects Us® is more than just Sloan's tagline. Sloan understands the dynamic relationship between the world's water management systems and its water ecosystems. They connect communities of engineers, architects, designers, building managers and owners to high-efficient products and systems to promote healthier water ecosystems for generations to come.

Green Product Features

- Reduces flush and flow water demand of built environment
- Effectively controlling the urinal and faucets operations by sensing human movements
- Low water flow rate in urinal and faucets

GreenPro Certified Products

- CONCEALED FLUSHOMETER VALVE FOR WC TRF156-4.8

Ready Mix Concrete

‘Ready Mix Concrete (RMC)’

Concrete is an essential part of a building construction. Materials and resources used for concrete making leads to significant amount of GHG emissions. Selection of right type of concrete is critical for individual applications and reducing the GHG emissions.

Ready Mix Concrete offers opportunity to design and develop application specific concrete and reduce the materials and related resource consumption. Use of application specific ready mix concrete enhances the overall green building performance. GreenPro enables the end-users to choose the following application specific RMC:

- Low Density Concrete for Non- Structural and Structural Applications,
- Self-Compacting Concrete,
- Concrete with high supplementary cementitious materials,
- Pervious concrete,
- High strength concrete
- Durable Concrete

Benefits & Contribution to Green Building Requirements

- Utilization of increased quantity of supplementary cementitious which reduces cement consumption and hence reduction in cost of construction.
- Use of application specific concrete leading to relevant benefits such as reduction in energy and water consumption during construction and operation
- Helps in achieving credits in Green Building Rating system

Companies

- ACC Limited
- Godrej & Boyce Mfg. Co. Ltd. Godrej Construction
- UltraTech Cement Limited – RMC Division

ACC Limited

Validity: Dec 2022

About Manufacturer

ACC Limited is one of India's leading manufacturers of cement and ready mix concrete with 17 cement factories, 75 ready mix concrete plants, over 7400 employees, a vast distribution network of over 10,000 dealers and a countrywide spread of sales offices. For over eight decades, ACC has earned the country's trust and goodwill through its valued product portfolio, ethical business practices and governance, focus on sustainable development, and its contributions to society. Sustainability is an integral part of ACC's business strategy with its Sustainable Development 2030 plan focusing on four broad themes: Climate, Circular Economy, Water & Nature and People & Communities. Its corporate social responsibility efforts benefit local communities across the country by ensuring economic and social progress.

Green Product Features

- High workability and flowable mix concrete, eliminating the use of vibrators.
- Contributes to savings in material, energy and reduction in noise.
- Substitution of OPC with flyash, GGBS or other cementitious material encouraging use of industrial waste.
- High Grade strength to reduce the overall use of concrete material during construction
- Use of crushed stone sand instead of river sand for manufacturing of ready mix concretes.
- Can resist chloride-induced or carbonation-induced corrosion, weathering action, chemical attack, or any other process of deterioration.
- Encourage use of low density insulating material leading to increased thermal insulation for the building envelope

Godrej & Boyce Mfg. Co. Ltd. Godrej Construction

Validity: Dec 2021

About Manufacturer

Godrej Construction is a strategic business unit of the highly diversified, Godrej & Boyce Mfg. Co. established in 1897. By imbibing the Godrej Group's core values, Godrej Construction has earned a reputation for meeting international quality standards while preserving the environment. Our competencies include expertise in construction materials, development of modern living spaces and leasing state-of-the-art commercial real estate. We offer a wide range of construction materials which include specially engineered ready mix concrete products, AAC blocks, recycled concrete blocks and pavers for different types of applications.

Green Product Features

- High workability and flowable mix concrete, eliminating the use of vibrators. Contributes to savings in material, energy and reduction in noise.
- Substitution of OPC with flyash, GGBS or other cementitious material encouraging use of industrial waste.
- High Grade strength to reduce the overall use of concrete material during construction
- Use of crushed stone sand instead of river sand for manufacturing of ready mix concretes.

UltraTech Cement Limited – RMC Division

Validity: Dec 2022

About Manufacturer

UltraTech Concrete is one of the largest RMC manufacturer in India with a nationwide presence established in less than two decades. UltraTech Concrete has achieved consistent quality & service through IT solutions. Their 'Expert Dispatch and Tracking System' (ED&TS) ensures optimum order booking, visibility and tracking of deliveries being made to the customers. The company fosters innovations that meet the versatile requirements of its large customer base.

Green Product Features

- High workability and flowable mix concrete, eliminating the use of vibrators. Contributes to savings in material, energy and reduction in noise.
- Substitution of OPC with flyash, GGBS or other cementitious material encouraging use of industrial waste.
- High Grade strength to reduce the overall use of concrete material during construction
- Use of crushed stone sand instead of river sand for manufacturing of ready mix concretes.

Solar Photovoltaic Modules

‘Solar Photovoltaic Modules’

Renewable energy usage in India has come about a long way contributing to about 24% of the total power generated. Of the various means of renewable power generation, usage of Solar Photovoltaics for the purpose, is the most popular with less number of constraints.

GreenPro enables the end users to choose high efficient Solar PV modules which are manufactured resource efficiently. It also ensures that the degradation overtime is of a lower rate ensuring a sustained high efficient energy generation.

Benefits & Contribution to Green Building Requirements:

- Use of high efficiency energy modules for building energy requirements
- Contributes to green buildings through prime performance of modules due to low degradation rate

Application

- Power Generation

Companies

- Emmvee Photovoltaic Power Pvt. Ltd.
- Waaree Energies Ltd

Emmvee Photovoltaic Power Pvt. Ltd.

Validity: Dec 2022

About Manufacturer

Emmvee is an intelligent solar solutions producer born from an idea to implement green energy to better use. Their solar products are an amalgamation of cutting-edge technology and smart innovation for sustainable living.

Emmvee aims at providing universally designed products to support all kinds of contemporary and lavish living. They have made continuous innovation in solar water heating systems and photovoltaic modules since inception in 1992. They have kept their priorities right, which is focused on quality and service dedicated to the customers. With a premium positioning in PV modules, the quality of the offering, timeliness of execution, customized approach and smart engineering is what makes them different in the solution space.

Green Product Features

- High module efficiency (monocrystalline - 18% and polycrystalline - 16.75%)
- Linear performance deterioration and power generation capacity at the 10 years is 91%
- Lower - Potentially induced degradation rate
- Resource efficient manufacturing process

GreenPro Certified Products

- Monocrystalline Solar PV Modules
- Polycrystalline Solar PV Modules

Waaree Energies Ltd

Validity: Dec 2021

One with the Sun

About Manufacturer

Waaree Energies Ltd. is the flagship company of Waaree Group, founded in 1989 with headquarters in Mumbai, India. It has India's largest Solar PV Module manufacturing capacity of 2 GW's at its plants in Surat and Umbergaon in Gujarat. Waaree Energies is amongst the top player in India in providing EPC services, project development, rooftop solutions, and solar water pumps and also as an Independent Power Producer. Waaree has its presence in over 350 locations nationally and 68 countries internationally.

Waaree's Vision is to provide high quality and cost effective sustainable energy solutions across all the markets, reducing carbon foot print - paving way for sustainable energy thereby improving quality of present and future human life.

Green Product Features

- High module efficiency (monocrystalline - 18% and polycrystalline - 16.75%)
- Linear performance deterioration and power generation capacity at the 10 years is 91%
- Potentially induced degradation is 0.5%
- Resource efficient manufacturing process

GreenPro Certified Products

- Monocrystalline Solar PV Module - Aditya Series
- Polycrystalline Solar PV Modules - Aditya Series

Tiles

'Tiles'

Tiles can be broadly classified into ceramic or vitrified typically glazed for internal uses and unglazed for roofing purposes. The roof tiles can have solar reflective coatings for minimizing the heat gain in the buildings.

GreenPro enables the end users to choose tiles which are manufactured resource efficiently and with locally sourced raw materials. It also ensures that tiles used for interior applications are free from hazardous substances.

Benefits & Contribution to Green Building Requirements:

- Use of high SRI tiles reduces the heat gain in the buildings
- Contributes to green buildings through material conservation and resource efficiency

Application:

- Flooring
- Roofing
- Pavement

Companies

- AB Ceramic Services Limited
- AET Building Products (WI) Pvt. Ltd
- NITCO Limited
- Prism Johnson Limited

AB Ceramic Services Limited

Validity: Dec 2021

About Manufacturer

AB Ceramic is an innovation hub of technologists offering pioneering ceramic cool roof solutions. As an end-to-end service provider, they bring rich insight, deep expertise and implementation excellence to all their activities. Patented in design with a reasonable choice of colours and designs, S.R.I tiles are glazed to achieve maximum whiteness and scratch resistance. The glossy matt finish is embossed and delivers an anti-skid surface as well. The grooves are also glossy, and this facilitate easy cleaning.

Green Product Features

- Roofing tiles with high 'Solar Reflectance Index' resulting in reduced heat gain from roofs
- Local procurement of most of the raw materials

GreenPro Certified Products

- Smart SRI Roof Tiles

AET Building Products (WI) Pvt. Ltd

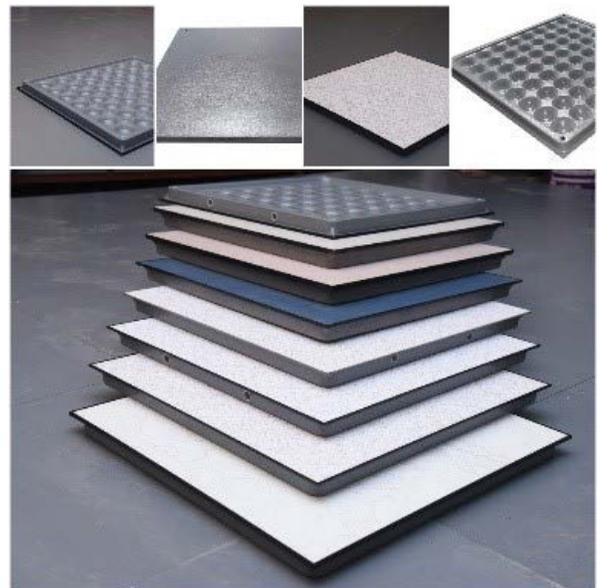

Validity: Dec 2021

About Manufacturer

AET Building Products (WI) Pvt. Ltd, have been pioneers in the design, development and manufacturing of Raised Access Floors since its inception in India. Spread over an area of 60,000 sq. ft., their manufacturing unit is state-of-the-art facility that is compliant with ISO 9001:2015 Quality Management Systems. All the raw material that goes into the FLEXI ACCESS FLOOR systems are procured locally.

AET Flexiblespace India Pvt. Ltd. aims to provide a complete package of Raised Flooring Environment Solutions to their esteemed clients. With the technical expertise, AET Flexiblespace (I) Pvt. Ltd., has come a long way since its inception and has cumulatively catered to more than 5 million square feet of workspace with great success.

Green Product Features

- Low concentration of heavy metals
- Use of ROHS compliant low VOC coating
- No formaldehyde and aromatic hydrocarbons used
- Contributes to enhancing the Health and well-being of occupants

GreenPro Certified Products

- FLEXI Steel Cementitious Tile
- FLEXI Steel Cementitious Tile with High Pressure Laminated Finish
- FLEXI Steel Cementitious Tile with Wooden Finish
- FLEXI Steel Cementitious Tile with Vitrified Tile Finish

Prism Johnson Limited

Validity: Dec 2021

About Manufacturer

Established in 1958, H & R Johnson (India) [Prism Johnson Limited] is the pioneer of ceramic tiles in India. For over five decades, HRJ has added various product categories to offer complete solutions to its customers. Today, HRJ enjoys the reputation of being the only entity in India to offer end-to-end solutions of Tiles, Sanitaryware, Bath Fittings, and Engineered Marble & Quartz.

All the products are sold under 4 strong brands, viz. Johnson, Johnson Marbonite, Johnson Porcelano and Johnson Endura. In ceramic / vitrified tiles, HRJ has a capacity of over 68 mn sq. mtr per annum spanning across 13 manufacturing plants across the country which is one of the largest manufacturing capacity in India.

Green Product Features

- Use of raw materials with recycled content to a tune of 24%
- Elimination of prohibited substances such as Lead, Mercury, Chromium, Arsenic etc.
- Locally sourced raw materials to a tune of 47%

GreenPro Certified Products

- JOHNSON ENDURA COOL ROOF - SRI TILES
- JOHNSON ENDURA STEPPING STONE
- JOHNSON ENDURA METEOR
- JOHNSON ENDURA TACTILES
- JOHNSON ENDURA HI-TRAFFIC TILE
- JOHNSON ENDURA SANDEX
- JOHNSON ENDURA SANDEX PLUS
- JOHNSON ENDURA ANTI STATIC TILES
- JOHNSON ENDURA ACID & ALKALI RESISTANT TILES
- JOHNSON ENDURA INDUSTRIAL TILE

Waste Water Treatment System

Waste Water Treatment System

Waste water treatment systems are a localized alternative to the municipal sewer systems where you can reclaim the water for reuse in flushing and gardening thereby reducing the fresh water requirement.

GreenPro enables the end users to choose systems which are manufactured to treat waste water efficiently. It also ensures that the reclaimed water is suitable for reuse free of odour and other contaminants present earlier in its sludge form.

Benefits & Contribution to Green Building Requirements:

- Lesser load on the municipal sewer system
- Water can be reused reducing the fresh water consumption

Application:

- Sludge treatment

Companies

- Aquatron International AB
- BioMicrobics Inc
- Daiki Axis India Pvt Ltd

Aquatron International AB

Validity: Dec 2022

About Manufacturer

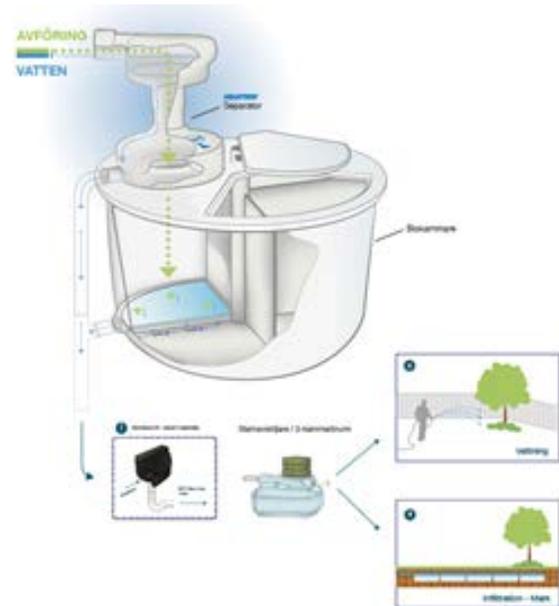

Aquatron International AB has over 25 years of experience of wastewater separation that works without electricity and chemicals. Aquatron solid-liquid separator is a patented and CE certified device that can separate faecal and any other solids from flushing water. It functions based on momentum of flushing water, centrifugal force and gravity.

Green Product Features

- Compact solution for separating solid waste from flush water in water closets
- Prevents sludge formation
- Enhances overall waste water treatment

GreenPro Certified Products

- Aquatron® Solid-Liquid Separator

BioMicrobics Inc

Validity: Dec 2022

About Manufacturer

Global manufacturer of integrated water solutions, BioMicrobics is a leader of advanced wastewater, water, greywater & stormwater treatment systems. Adopting new “integrated water management” technologies and innovations will rethink our relationship with water and how we can better manage it. Interest is rising in integrated solutions that meet the increasingly complex need for utility resilience. The quality products and proven performance solutions by BioMicrobics are certified and verified for BETTER sustainable water management.

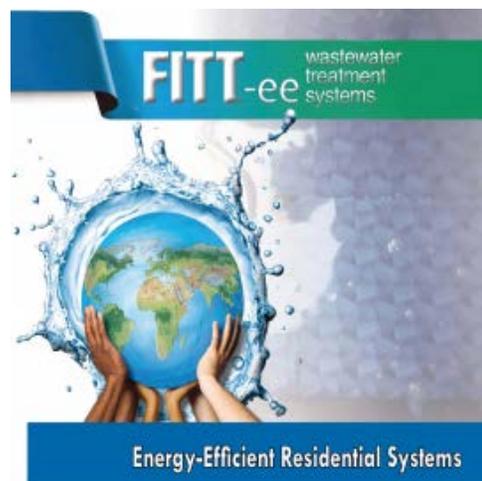

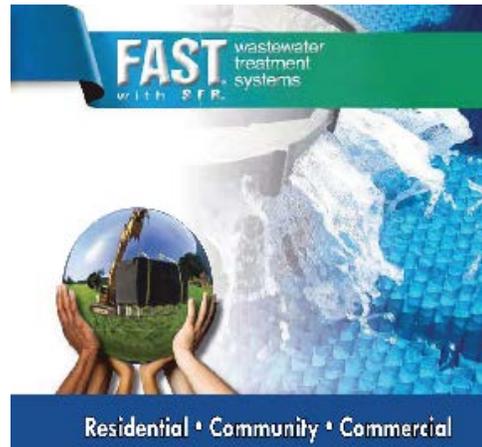

BioMicrobics solutions are pre-engineered, pre-packaged, and scalable to efficiently lower the cost of pretreatment, waste management and better onsite sanitation from 150 GPD to 2,000,000 GPD flows and water recycling opportunities.

Green Product Features

- Treated waste water quality meets CPCB parameters such as pH, BOD, COD and TSS
- No chemicals required for waste water treatment
- Energy efficient treatment system

GreenPro Certified Products

- Fixed Activated Sludge Treatment (FAST)
- Fixed Integrated Treatment Technology energy efficient (FITT-ee)

Daiki Axis India Pvt Ltd

Validity: Dec 2022

About Manufacturer

Having spent half a century focusing on water and people's lives, Daiki's goal is to continue working towards becoming an "eco-creation and development company" that provides greater support to humans and the natural environment.

Daiki believes that activities which create environments for the protection of water, soil and air -essential for human life and will become extremely vital for our Earth. Daiki Axis aims to continue its water-related businesses to grow into a corporate group that continues to help build a living environment that is both earth-friendly and comfortable.

Green Product Features

- Treated waste water quality meets CPCB parameters such as pH, BOD, COD and TSS
- No chemicals required for waste water treatment except disinfectant
- Specific energy consumption for waste water treatment is 0.5 kWh/KLD

GreenPro Certified Products

- Johkasou Packaged Sewage Treatment System

Confederation of Indian Industry

About Confederation of Indian Industry (CII)

The Confederation of Indian Industry (CII) works to create and sustain an environment conducive to the development of India, partnering industry, Government, and civil society, through advisory and consultative processes.

CII is a non-government, not-for-profit, industry-led and industry-managed organization, playing a proactive role in India's development process. Founded in 1895, India's premier business association has around 9000 members, from the private as well as public sectors, including SMEs and MNCs, and an indirect membership of over 300,000 enterprises from around 288 national and regional sectoral industry bodies.

With 68 offices, including 10 Centres of Excellence, in India, and 8 overseas offices as well as institutional partnerships with 394 counterpart organizations in 133 countries, CII serves as a reference point for Indian industry and the international business community.

'GreenPro' Green Product Certification

About CII - Green Products & Services Council

The Green Products and Services Council was formed by CII-Sohrabji Godrej Green Business Centre, CII's Developmental Institute on Green Practices & Businesses.

The objective of the Council is to facilitate Green Product Market Transformation in India.

The Council is committee-based, member-driven and consensus-focused. The Council involves all major stakeholders including Government, Product Manufacturers, Standard Developers, Conformity Agencies, Product Testing Laboratories, Academia.

The Green Products and Services Council presently offers GreenPro Certification for Materials, Products and Technologies. The Standards are developed based on consensus by Technical Committees involving all major stakeholders.
