

Objections / Suggestions on TGNPDCL filings as per public notice dated 07 Feb 2025 – Reg

Dear Sir/Madam,

Please find below points towards the TGNPDCL filings.

It is accepted that both TGSPDCL and TGNPDCL have same Retail Supply Tariff.

When TGSPDCL could get 13700cr revenue for 18900 MU (LT category excluding Agriculture) sales, TGNPDCL should get at par revenue for 6840MN sales. Near to 1000cr of more revenue can be achieved in this category alone. Same goes with other categories too.

Total energy requirement is projected as 27143MU and average power purchase cost is shown as 5.54/KWh. This boils down to 15060cr. an increase of about 140cr is projected to total power purchase cost.

LT IX EV Charging stations are projected at 5% growth where as revenue projected decrease from FY 2023-24 actuals of 0.16cr to 0.11cr. In fact, growth could be even more. TGSPDCL has projected 4X growth.

Electrical Accidents reports details are not consistent in page (pg 85,86) 100, 101 of the pdf document. Exgratia is paid to more than sanctioned. 825 lakhs paid to 165 human beings, against sanctioned 585c to 113 human beings. Same thing goes with Animals numbers. More than 3cr exgratia paid in excess to the sanctioned amount.

Around 50cr Rs of Customer charges are collected from about 14 lakh LT V (Agriculture), non-corporate farmers.

It has been quite a long time farmers saw a direct benefit. Please kindly consider waiving this 50cr customer charges too and make Electricity for Agriculture / Farmers FREE in real sense.

LT I (B) and LT 1 (C) stab structure is not available as per RST orders. Nomenclature should be consistent.

For LT consumers Fixed charges supposed to be collected on Contracted Load not on Demand (RMD). Load and Demand are not same. More over fixed charges are charged at multiples of 10.

Advance meter readings are resulting in higher slab tariff billing, which is against natural principles and anti consumer billing. Electricity Supply Code or GTCS didn't have a mention to do same. I didn't find any direction / circular / regulation detailed such billing calculation.

Thanks and Regards
