Subject: Requesting and objections regarding solar net meter energy guidelines & registration for participating in public hearing at Hanamkonda collector office on 5th March 2026-Reg

To: <secy-tgerc@telangana.gov.in>

Respected sir,

I am ERUKULLA RAJNEESH, My Service number: 12204 163314(USC No:17069050).Kazipet Circle, NPDCL, HANAMKONDA DISTRICT, TELANGANA STATE -506003.

According to your recent guidelines,

1)Solar generated Units Rate decreased from Rupees 5.257 to 2.57.It very huge loss to consumer. If it is need to decrease the price, then some percentage only to be decrease.
Not much that more than 50% decreased.
Why the rate was decreased all of sudden?

2)Every consumer, not every month energy consumption equal. But in your guidelines, that every month basis redemption not favourable to consumers. In peak season every consumer to bill, instead of 6 months basis.

3)For example,

If a consumer consumer 400 KWH units and generates 300 KWH Units, Then he has to pay either 2.57×100 Units or lower slab rate $\times 100$ Unit. But, they charges 400 higher slab rate -(minus) 300×2.57 . So that difference of charge is huge high.

Solar consumers selling price = Solar consumers buying Price should be equal

(Or) difference of units in lower slab rates to charged in a truth manner.No loss No gain formula to be followed. If your orders/guidelines not benifit to Solar consumers, then Not to be loss the Solar consumers.

4)If a consumer genarats excess Units than consumed Units, why to pay minimum/fixed charges to pay? Is it Justice Sir? Already that customer genarats excess, why to pay?

Central government giving Subsidy and promoting Solar energy installations, but your your orders are against the Spirit to Central government.If this type of negitive signs from your side before solar installation, then we will not come forward and not to do installation.

If you not to encourage no problem, but to discourage is very much problem. Negitive signs will arise all over telangana.You can do statistics that, solar installations gradually decrease over a long period.

If your orders not modified, then me and my all friends and Coligues and all are Willing to remove installations and give to back subsidy amount and give the project cost back to our concerned respective bank accounts.

Please kindly request to you for review the orders/guidelines once and do justice Sir.

With Warm regads

Erukulla Rajneesh
