

To
The Commission Secretary,
Telangana Electricity Regulatory Commission (TGERC),
Vidyut Niyantran Bhavan,
GTS Colony, Kalyan Nagar,
Hyderabad - 500045.

Respected Sir/Madam,

I, the undersigned farmer and individual beneficiary/prospective beneficiary under the PM-KUSUM Component-A Scheme, respectfully submit my strong objection to the proposal to reduce the tariff from ₹3.13/kWh to ₹2.98/kWh. I request the Hon'ble Commission to reconsider this proposal and instead enhance the tariff to ensure the long-term viability and sustainability of solar power projects implemented by farmers like me.

My objections are based on the following grounds:

- 1. Increase in Project Costs:** The cost of solar modules, mounting structures, inverters, transformers, cables, land development, and other balance-of-system components has increased significantly. Additionally, labour, transportation, and installation expenses have also risen, making project implementation more expensive than earlier estimated.
- 2. Higher Cost of Finance:** Interest rates on loans and overall financing costs have increased. A reduction in tariff will adversely affect project cash flows and make it difficult for me to repay loans and maintain the project efficiently.
- 3. Operation and Maintenance Expenses:** Annual operation and maintenance costs have increased due to inflation, rising wages, equipment replacement needs, insurance premiums, and other recurring expenditures.
- 4. Reduced Financial Viability:** The proposed tariff reduction will significantly reduce project returns, making investments under PM-KUSUM Component-A financially unviable for individual farmers, particularly small and marginal farmers like myself.
- 5. Contrary to the Objectives of PM-KUSUM:** The PM-KUSUM Scheme aims to enhance farmers' income, promote decentralized renewable energy generation, and strengthen rural livelihoods. A tariff reduction would discourage farmer participation and weaken the core objectives of the scheme.
- 6. Need for Tariff Enhancement:** Considering current inflation, rising capital costs, and increasing operational expenses, there is a strong justification for revising the tariff upward rather than reducing it. An enhanced tariff would ensure financial sustainability and encourage greater participation of farmers in the scheme.

In view of the above, I respectfully request the Hon'ble Commission to:

- Reject the proposed reduction of the PM-KUSUM Component-A tariff from ₹3.13/kWh to ₹2.98/kWh.
- Conduct a fresh and realistic assessment of current capital and operational costs.
- Enhance the tariff to reflect present market conditions and ensure reasonable returns for individual farmers.
- Safeguard the interests of farmer beneficiaries and support the successful implementation of the PM-KUSUM Scheme.

I trust that the Hon'ble Commission will consider my objections sympathetically and take a fair, balanced, and farmer-friendly decision in the larger public interest.

Thank you for your consideration.

Yours faithfully,

NAME: DUBBAKA RAMULU
