

To
Chairman,ERC,
Government of Telangana,
Hyderabad.

Subject: Request for Revision of PM-KUSUM Tariff – Reg.

Respected Sir, cb

I am a PM-KUSUM applica nt and have already executed the Power Purchase Agreement (PPA) with TGNPDCL at a tariff of ₹3.13 per unit.

It is understood that the tariff is under review based on the reduction of GST on certain materials. However, the overall project cost has increased substantially due to prevailing market conditions. The prices of solar PV modules, steel, transformers, electrical equipment, cables, transportation, labour, and other construction materials have risen significantly because of global supply chain disruptions and international economic conditions. Consequently, the total project cost has increased by approximately 20–25%.

Under these circumstances, implementing the project at the existing tariff of ₹3.13 per unit has become financially unviable. A further reduction in tariff would severely affect the financial sustainability of PM-KUSUM projects and discourage investors, thereby impacting the successful implementation of this flagship renewable energy programme.

In view of the above, I humbly request the Government to kindly consider the prevailing market realities and revise the tariff to ₹4.50 per unit so that the projects remain economically viable and the objectives of the PM-KUSUM Scheme are achieved successfully.

I request your kind and sympathetic consideration and early favorable action in the interest of all PM-KUSUM applicants in Telangana.

Thanking you.

Yours faithfully,

J. R. Chavan (Cell .no: 9848804580)

PM-KUSUM (Applicant No- 447/26)
