To
The Commission Secretary,
Telangana Electricity Regulatory Commission (TGERC),
Vidyut Niyantran Bhavan,
GTS Colony, Kalyan Nagar,
Hyderabad – 500045.

Sub: Objections to the proposed reduction of PM-KUSUM Component-A tariff from ₹3.13/kWh to ₹2.98/kWh and request for tariff enhancement by considering the incremental project Cost.

I respectfully submit this representation as a stakeholder and prospective Solar Power Generator (SPG) under PM-KUSUM Component-A Scheme

My submissions/ objections

1. PPA was executed for prefixed levelized tariff per unit & Fixed quantum of units for the entire contract period of 25 years, along with placement of SPG to the same financial position in case of change in law. TGSPDCL/DISCOMs has filed the petition for downward revision of tariff considering the reduction in GST from 12% to 5%. TGSPDCL/DISCOMs have grossly failed to take into account the impact of increased cost of various equipment, Steel, Copper, transportation, insurance premiums & labour charges involved in developing these projects arising from the influence of various global factors not under the control of SPG/Farmers in the recent past.

In fact, the tariff should be revised upward instead of requesting for downward revision.

2. Reduction in GST also dented >25% benefits to SPGs/Farmers of PM KUSUM Component -A scheme related to Refundable SGST.
3. GST is the government policy affecting all citizens and institutions across the country. It is neither specifically applicable only to TGSPDCL/DISCOMs nor PM KUSUM component-A stakeholders. In future also GST changes affect everyone and all of us need to abide by it without any exemptions. Hence it is not to construe GST changes as change in law affecting only the PM-KUSUM Component A stakeholders or the TGSPDCL/DISCOMs.

4. It is also important to note that 3% interest subvention for the initial 2cr loan facility in this scheme is being denied by NABARD when these plants are established by group of farmers. It's only applicable to single farmer established solar power plant as per NABARD, thus adding more financial woes to small farmers.
5. These projects are established by Farmers and not by corporate houses, if at all any meagre real benefit is there it should be on the Farmer's side, to encourage more entrepreneurship locally in future from small investors to strengthen the rural employment which is the backbone of our Nation's economy.
6. It is noteworthy to mention that SPGs/Farmers without much technical knowledge & know how's have come forward to participate in this flagship program by pooling up the required margin money from their personal lifetime savings to establish these projects, adding value to the energy sector of national significance. Such kind of unwarranted and ill-conceived petitions lead to betrayal of trust and demoralize the Farmers from participating in such future programs of the Government of Telangana and India.

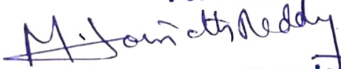

In view of the above facts and circumstances, I humbly request the Hon'ble commission to:

- A. Reject the proposal to reduce the tariff from ₹3.13/kWh to ₹2.98/kWh.
- B. Consider revising and enhancing the tariff to at least ₹4.00/kWh to reflect current project costs & ensure financial viability
- C. Protect the interests of farmers, small investors, and renewable energy developers participating under PM-KUSUM Component-A Scheme.

I sincerely request the Hon'ble Commission to consider the above submissions in the interest of renewable energy development, farmer welfare, investor confidence, and long-term sustainability of PM-KUSUM projects in Telangana.

Thanking you

Sincerely,

For PRAJWAL POWER
Managing Partner
