Dear sir's/Madam's

What you are suggesting is that the price will very difficult to bear for the farmers due to the present project material cost, day to day expenses and Banks EMI's and interest payments and delay in in the commissioning as well invisible maintenance expenses even you pay Rs 3.13 per unit. We're expecting and suggesting some more increase amount for the present PPA signed unit rate i.e. Rs 3.13 to Rs 4.00. then only project is viable and support/ helping to farmers through the PM-Kusum scheme which is both Governments dream project.

Alredy we're sinked in the private borrowings, debts and facing lot of problems/troubles in the implementation of the project till last one year. Still it's not commissioning and paying Bank interests in every month without income from expecting from this project. It's very heavy burden to us.

From the beginning of the PM-Kusum scheme we thought it's very useful, benifit and having bright future to the farmers which is provided by the PM/CM through TGREDCO/DISCOM. Advertisements also looks like that. But in the real field and implementation part is totally different. We're unable to bear the project burdens and helpless from the field level issues.

If possible request you to handover the Bank loan and return our project payments to us and takeover the project along with payment to our (farmers) project land market value price. And release from the present burdens what we're facing from last one year with this project.

PM sir/CM sir and related TGREDCO/DISCOM/govt. authorities please see our problems / perceive and uplifting the farmer's which is implementing the solar plants in our agriculture land otherwise we have no any alternate way to live. Please save us. Atleast request you all don't reduce the unit price from Rs 3.13 and pl see field level implementation/commissioning issues.

Thanks
